- A. Trusted, and suspect connections
- B. Authenticated, and trusted connections
- C. Authenticated, suspect, and anonymous connections
- D. Authenticated, trusted, and anonymous connections

Answer: B

Question No : 6 - (Topic 0)

Mail cell routing information is registered where in IBM Workplace Messaging?

- A. Lotus Workplace>Messaging>Directory Settings for Messaging
- B. Lotus Workplace>Messaging>Mail cells>Mail cell routing
- C. Lotus Workplace>Directories>Directory Settings for Messaging
- D. Lotus Workplace>Directories>Messaging Settings>Mail cell routing

Answer: C

Question No : 7 - (Topic 0)

The "maximum number of received headers" setting controls which one of the following options?

- A. This setting specifies the maximum number of inbound sessions allowed to the server.
- B. This setting specifies the maximum number of recipients allowed on an inbound mail message.
- C. This setting specifies how much information should be displayed in the received header when viewing the message.
- D. This setting specifies the maximum number of received headers allowed before the message is considered looping and sent to the dead letter queue.

Answer: D

Question No : 8 - (Topic 0)

In a Network Deployment, you run the IBM Workplace installation program on every server in the deployment except for which one of the following?

- A. The database server and LDAP server
- B. The LDAP server and the remote HTTP server
- C. The remote HTTP server and WebSphere Portal Server
- D. The WebSphere Portal Server and WebSphere Application Server

Answer: B

Question No : 9 - (Topic 0)

When configuring the SMTP Inbound Service, which one of the following settings takes precedence?

- A. Cell level settings
- B. Server level settings
- C. Administrator level settings
- D. Virtual queue level settings

Answer: B

Question No : 10 - (Topic 0)

To set the postmaster and dead letter addresses for IBM Workplace Messaging, where must the administrator navigate to in the WebSphere Administrative Console?

- A. Lotus Workplace>Cell Settings>Mail Properties
- B. Lotus Workplace Messaging>Mail Services>Properties
- C. Lotus Workplace>Mail Cell-Wide Settings>General Properties
- D. Lotus Workplace Messaging>Cell Services>Administrative email

Answer: C

Question No : 11 - (Topic 0)

IBM Workplace Messaging allows the administrator to specify a local domain smart host. What function does this provide?

- A. This setting denies messages for unknown recipients sent to the local domain.
- B. This setting specifies an alternate local domain address for outbound mail messages.
- C. This setting allows messages to be routed to a default mailbox when the recipient is unknown in the local domain.
- D. This setting specifies the host name or the IP address of the mail server to which a message is routed when a recipient cannot be found.

Answer: D

Question No : 12 - (Topic 0)

You cannot install IBM Workplace on a WebSphere node that is already part of a Network Deployment. What steps must be performed instead?

- A. Install and configure a new IBM Workplace environment; then synchronize the two through DBMS.
- B. Install and configure a new IBM Workplace environment; then synchronize the two through LDAP.
- C. Install and configure IBM Workplace on multiple stand-alone servers, and then add (or aggregate) each of these servers to the Network Deployment environment.
- D. Install and configure IBM Workplace on multiple stand-alone servers, and then separate (or "aggregate") each of these servers

into different Network Deployment environments.

Answer: C

Question No : 13 - (Topic 0)

Part of enabling security between WebSphere Portal and an LDAP directory involves modifying properties in which one of the following files?

- A. <wp_root>\ldap\wpconfig.properties
- B. <wp_root>\config\wpconfig.properties
- C. <wp_root>\config\ldaphost.properties
- D. <wp_root>\ldap\ldaphost.properties

Answer: B

Question No : 14 - (Topic 0)

Smart host mail routing provides which one of the following results?

- A. All received messages are prioritized based on policies.
- B. All messages destined for the Internet are sent to the most available server.
- C. All received messages are spooled and sent in batches to users for bandwidth savings.
- D. All messages addressed to unknown recipients in the local Internet domain are sent to this configured host.

Answer: D

Question No : 15 - (Topic 0)

By default, IBM Workplace Collaboration Services assigns users to policies by matching the user's Distinguished Name to what?

- A. A Distinguished Name scope you specify in a policy
- B. A UN scope you specify in a policy
- C. A Name scope you specify in a policy
- D. A User scope you specify in a policy

Answer: A
