Mac OS X Server Essentials 10.6 200

Version: 5.0

[Total Questions: 76]

Question No : 1

Review the image, and then answer the question below. You have managed the Dock preferences to define where on the computer screen the Dock will appear for these four accounts: Lab (a computer group), Science1 (a computer in the Lab computer group), Teachers (a workgroup), and John (a member of the Teachers workgroup). When John logs in on the Science1 computer, where on the computer screen does the Dock appear?

Account	Manage	Application
 John	 Never	 Bottom
 Teachers	 Always	 Left
 Science1	 Always	 Right
 Lab	 Always	 Bottom

- A. bottom of the screen
- B. left side of the screen
- C. right side of the screen
- D. John will be prompted to choose whether his user preferences or the Teachers workgroup preferences should be used. The Dock will appear at the location of his choice.

Answer: C

Question No : 2

What is the function of the Mobile Access service in Mac OS X Server?

- A. It synchronizes user home folders between the server and mobile computers.
- B. It delivers notifications for email and calendar to mobile devices outside the firewall.
- C. It provides mobile users secure access to the server's private services without requiring VPN connections.
- D. It copies network user accounts to portable computers to allow user to log into the

computers even when the computers are not connected to a network.

Answer: C
