Exam C2050-219

IBM Sterling Order Management V9.1, Deployment

Version: 6.0

[Total Questions: 103]

Question No : 1 - (Topic 0)

Due to an enterprise-wide license agreement, a company uses a database from aparticular vendor. The database to be used for development is supported per the System_Requirements_Guide.pdf. The testing, staging, and production deployments are however going to use a different database (from a different vendor), which is also a supported database. Which statement is true about this situation?

A. The IBM Sterling Selling and Fulfillment Suite allows for the databases to be different between development, testing, staging and production deployments.
B. Since the IBM Sterling Selling and Fulfillment Suite uses standard JDBC to connect to the database, questions around compatibility of databases must be directed to the database vendors.
C. Even though it might work, the IBM Sterling Selling and Fulfillment Suite deployment will be supportedby IBM only if the database used for production remains the same as the one used for development.
D. The IBM Sterling Selling and Fulfillment Suite deployment contains code that is database specific; therefore, it is not advisable to use different databaseproviders between development and production environments.

Answer: A

Question No : 2 - (Topic 0)

While installing the IBM Sterling Selling and Fulfillment Suite in the GUI mode, the installation fails with an error indicating a user permission issue on the databaseschema. On researching the issue, it is discovered that the user has not been granted "CREATE TABLE" permission on the schema. The database administrator who can provide access is not accessible until the end of the week. Which statement is true regardingthe application installation procedure?

A. The installation has to be rerun from the beginning after the permission has been granted to the user.
B. The IBM Sterling Selling and Fulfillment Suite should be re-installed with the option to use the databasebundled along with it.
C. The installation can be run in a mode such that it does not connect to the database and the database scripts can be run later when the permission issue is resolved.
D. Since the issue is only a permissions issue, the installationcan be run with a parameter in the silent file so it would ignore such errors and complete the installation successfully.

Answer: C

Question No : 3 - (Topic 0)

Which two segment types are provided in IBM Sterling Selling and Fulfillment Suite?

A. Made to fulfill
B. Made to order
C. Made to stock
D. Made to demand
E. Made to customer

Answer: B,E

Question No : 4 - (Topic 0)

A customer places an order of amount $100. As per their business rules, if the payment method is credit card the retailer has to authorize the credit cardby contacting the payment gateway for the complete order amount before the order can be scheduled. Which execution step needs to be completed for the payments on the order to be authorized and the details stored against the order?

A. The managePaymentTerms API needs to be invoked with the appropriate order and payment information in the input.
B. The executePaymentTransactions API needs to be invoked with the appropriate order and payment information in the input.
C. The Payment Collection, Payment Execution and Payment Collection transactions should be executed in that sequence for the order.
D. The payment status on the order has to be manually changed to UTHORIZED?from the Sterling Selling and Fulfillment Foundation console.

Answer: C

Question No : 5 - (Topic 0)

Aspecific customer implementation requires IBM Sterling Selling and Fulfillment Suite to create procurement transfer orders at the time of scheduling the original order. For achieving this, sourcing rules must be configured to use ship nodes instead of distribution rules. Which additional parameters must be passed for the order creation?

A. The shipping node and receiving node are passed at the order line level.

B. The enterprise, buyer, and order type are passed at the order header level.
C. The shippingnode, receiving node, and catalog organization are passed at the order line level.
D. The shipping node, receiving node, buyer, and enterprise are passed at the order header and line level.

Answer: A

Question No : 6 - (Topic 0)

Synchronous services can be invoked inthe IBM Sterling Selling and Fulfillment Suite through which two components?

A. Actions
B. Conditions
C. User Exits
D. Agent Server
E. Integration Server

Answer: A,C

Question No : 7 - (Topic 0)

A company wants to run the schedule agent in multiple environmentseach having different provider URL values for their JMS queues. However, they do not wish to modify the agent configuration on each environment to the corresponding provider URL value. How can this be achieved?

A. Set the provider_url value in the sandbox.cfg file on each environment correctly.
B. Set the value of the yfs.agent.override.providerurl property in the jms.properties file.
C. Set the value of the yfs.agent.override.providerurl property in the servers.properties file.
D. Override the value of the yfs.yfs.agent.override.providerurl property in the customer_overrides.properties file.

Answer: D

Question No : 8 - (Topic 0)

Using the Exception Console of the IBM Sterling Selling and Fulfillment Suite, the exceptions raised by asynchronous services can beviewed. The developer needs the ability to view the error XML, modify it, and process it. Which property of the Receiver Link Exception Handling properties should the developer turn on?

A. Is Reprocessible
B. Handle Exceptions
C. Process Exceptions
D. Reprocess Exceptions

Answer: A

Question No : 9 - (Topic 0)

A retailer needs different types of items to be associated with their corresponding provided services. For example, all the televisions need to be associated with an installation service, whereas microwaves need to be associated with a product demo service. What should be created to help achieve this?

A. Create an asset for the item contains the associated service.
B. Create an item classification with the purpose set as service Association
C. Create item attributes for each item type with purpose set as service Association
D. Create item categories for each item type with purpose set as service Association

Answer: B

Question No : 10 - (Topic 0)

Payment Administration users should be able to view only payment related alerts while Node Administrator users should be able to view all alerts. Which approach achieves this?

A. In the alert configuration in Applications Manager, under Application > Application Platform > Alert > Exception Type appropriately define the users whowill need to view the alert.
B. In the alert configuration for Exception Type Role in Applications Manager, under Application > Application Platform > Alert > Exception Type Role appropriately define the users who will need to view the alert.
C. In the alert queue configuration in Applications Manager, under Application > Application Platform > Queue Management add the users corresponding to the Payment

Administration and Node Administrator users appropriately to the correct queues.
D. In the alert queue configuration in Applications Manager, under Application > Application Platform > Queue Management add the user groups corresponding to the Payment Administration and Node Administrator users appropriately to the correct queues.

Answer: C

Question No : 11 - (Topic 0)

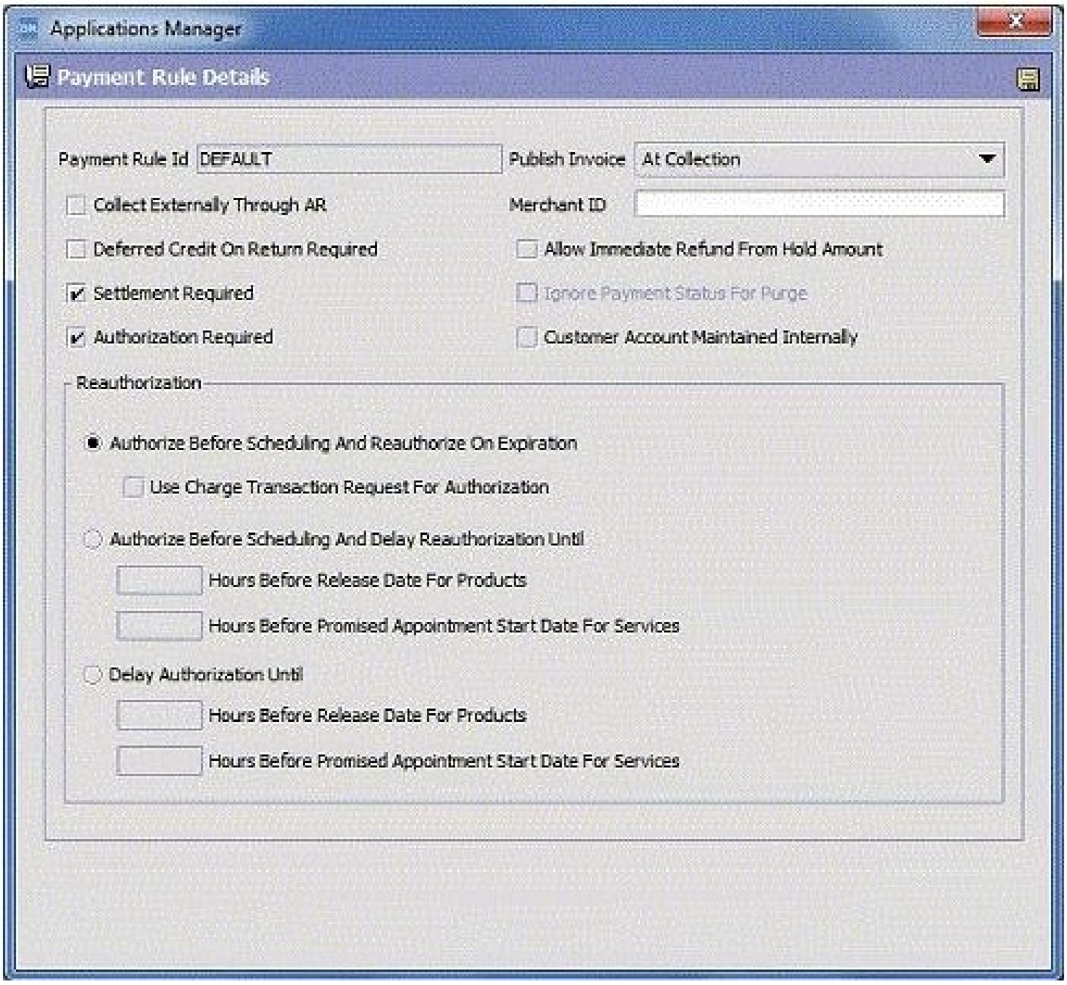
A retailer wants to have different process flows for orders created online and from their stores. How can this efficiently be achieved?

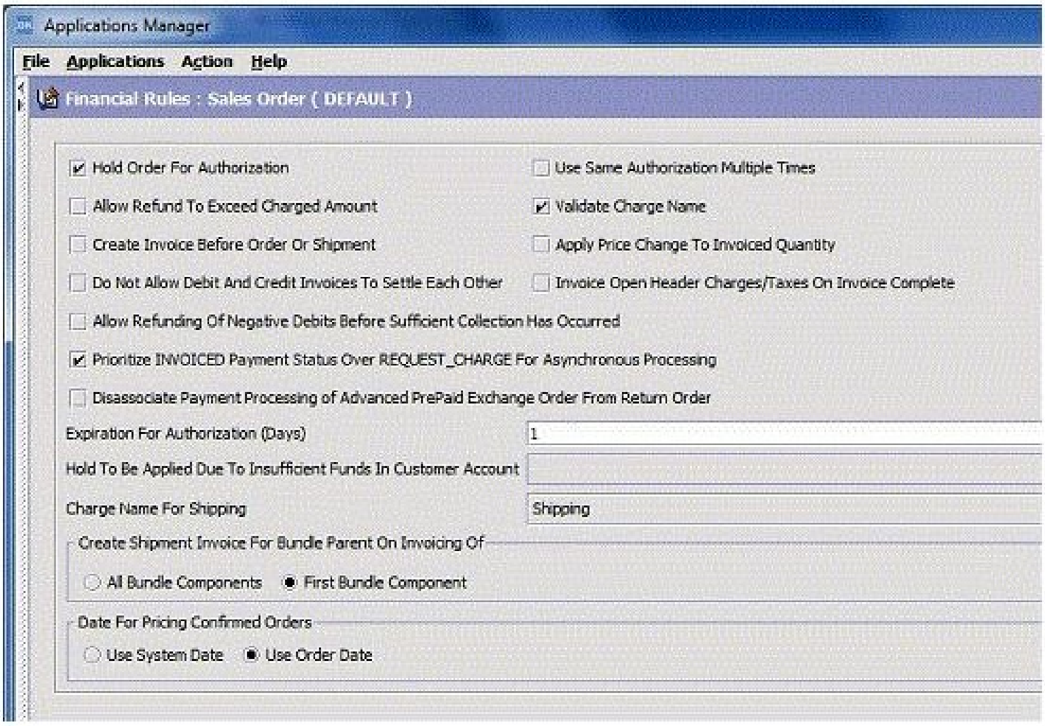
A. Create separate document types for online and store orders.
B. Configure a hub rule that will move online and storeorders to different pipelines.
C. Implement the YFSVerifyOrderUE to check for the different modes of order capture.
D. Pass different values for the 'Channel' attribute in the input and distinguish the two in the ON_SUCCESS event of createOrder API.

Answer: B

Question No : 12 - (Topic 0)

A customer credit card has been authorized with an authorization expiration date of September 28. The order does not get settled before September 28 and the payment configurations are as shown below.





On which date will the IBMSterling Selling and Fulfillment Suite raise a reauthorization request?

A. September 27A.September 27
B. September 28B.September 28
C. September 29C.September 29
D. September 30D.September 30

Answer: A

Question No : 13 - (Topic 0)

A buyer in the supply chainnetwork requires certain compliance services (such as adding an RFID label) to be performed for certain items. Which statement is true about the fulfillment process for this item?

A. Compliance services can be performed for only bundle items.
B. Compliance services can be configured at item level for each buyer.
C. Compliance services can be configured at the enterprise, buyer, and item level.
D. Compliance services can be configured for a buyer at the item classification level.

Answer: D

Question No : 14 - (Topic 0)

A service provider offers installation and haul away services for appliances and furniture. The services are offered by two teams, each specializing in either appliances or furniture. On receiving a request for a service, the service provider would like to use the closest team to the customer that also has the relevant skills. How can this requirement be achieved?

A. The ship node servicing the customer's shipping address should be stamped as the "ServiceNode" on the service order line.
B. The installation and haul away items should be modeled as service items in the catalog and Sourcing rules for provided services should be configured.
C. The installation and haul away should be modeled as accessories to the main product (appliance and furniture) so the sourcing rules for the product will also look for capacity for the accessories.
D. The service items should be defined in the catalog along with their association with the main product (appliance and furniture). The sourcing rules for the productitem will then automatically identify the right ship node that can offer the service.

Answer: B

Question No : 15 - (Topic 0)

An organization is using the Service Builder to create a service for transforming data from one format to the other (EDI to XML). However, they are unable to do so as they encounter errors while trying to save the service. Which two options may be responsible for this?

A. A transport node is missing.
B. A component node is missing.
C. An API component exists without System Arguments specified.
D. An API component exists without the template file name specified.
E. All required properties on all nodes and links do not have values specified.

Answer: B,E

Question No : 16 - (Topic 0)

Which two statements are true in determining the work order type, either Provided Service (PS) or Delivery Service (DS) Work Order?

A. A work order is considered to be a DS work order if all the lines present are DS lines.
B. A work order is considered to be a PS work order if all the lines present are PS lines.
C. A work orderis considered to be a DS work order if there is at least one DS line present.
D. A work order is considered to be a PS work order if there is at least one PS line present.
E. A work order is considered to be a PS work order if services are completed at theship node.
F. A work order is considered to be a DS work order if services are completed at the ship node.

Answer: A,D

Question No : 17 - (Topic 0)

In a current implementation of IBM Sterling Selling and Fulfillment Suite, only default demand types are used. A Kitting Work Order is created for Kit Item "Kit1" with a quantity of 10. The Work Order is released and the pick tasks are generated for the component items. Following is the Kit configuration:

Kit Item ID : Kit1
Item1, Kit Qty : 2
Item2, Kit Qty : 1
Item3, Kit Qty : 4
