Exam 000-033

IBM Tivoli Application Dependency Discovery Manager V7.2 Implementation

Version: 6.0

[Total Questions: 133]

Topic 1, Volume A**Question No : 1 - (Topic 1)**

What must be done for a newly created scope to work properly?

- A. Create a gateway list that can be used for the scope.
- B. Create an access list with working credentials for the scope.
- C. Create a credentials list with working credentials for the scope.
- D. Create application templates with working credentials for the scope.

Answer: B

Question No : 2 - (Topic 1)

Which user account is required in the LDAP registry for configuring access to IBM Tivoli Application Dependency Discovery Manager V7.2, its objects, and its services?

- A. root
- B. cmdbuser
- C. taddmuser
- D. administrator

Answer: D

Question No : 3 - (Topic 1)

What is the documented number of servers IBM Tivoli Application Dependency Discovery Manager V7.2 can support in a default installation?

- A. 10000
- B. 20000
- C. 30000
- D. 90000

Answer: A

Question No : 4 - (Topic 1)

Which information element is stored within the configuration management database as a repository for incidents?

- A. Sev 1
- B. Change
- C. Problem
- D. Critical Situation

Answer: C

Question No : 5 - (Topic 1)

What are the minimum CPU and RAM requirements for each IBM Tivoli Application Dependency Discovery Manager V7.2 server for a small environment?

- A. 2 x 2.0 GHz CPU, 4 GB RAM
- B. 3 x 1.0 GHz CPU, 4 GB RAM
- C. 2 x 2.0 GHz CPU, 2 GB RAM
- D. 1 x 1.0 GHz CPU, 4 GB RAM

Answer: A

Question No : 6 - (Topic 1)

What makes up a discovery profile in IBM Tivoli Application Dependency Discovery Manager V7.2?

- A. A group of discovery scans.
- B. A group of access lists and scopes.
- C. A group of computer systems and credentials.
- D. A group of sensors and sensor configurations.

Answer: D

Question No : 7 - (Topic 1)

Which components need to be considered during the design phase of an IBM Tivoli Application Dependency Discovery Manager V7.2 deployment?

- A. Domain Servers
- B. Security Servers
- C. Fail-over Gateways
- D. Domain Controllers

Answer: A

Question No : 8 - (Topic 1)

What is the output of a discovery library adapter?

- A. UML book
- B. IdML book
- C. HTML file
- D. Jython file

Answer: B

Question No : 9 - (Topic 1)

What should be estimated when designing an IBM Tivoli Application Dependency Discovery Manager V7.2 architecture?

- A. The number of realms involved in the deployment.
- B. The number of computer systems to be discovered.
- C. The number of databases used in the architecture.
- D. The number of routers that are deployed in the network.

Answer: B

Question No : 10 - (Topic 1)

A customer has provided lists of business applications and the names of the servers on which they run. After comparing them to the scope of work, there are several differences

between the lists. Which two options resolve the differences? (Choose two.)

- A. Work with the customer to reduce the number of servers associated to a business application.
- B. Work with the customer to add the unlisted servers associated to a business application to the scope of work.
- C. Add the unlisted servers associated to a business application to the scope of work and submit the new scope of work for approval.
- D. Add the unlisted servers associated to a business application to the scope of work and submit a change request with the customer.
- E. Use the scope of work listing as the baseline to begin work and submit a change request for the additional servers associated to a business application.

Answer: A,B

Question No : 11 - (Topic 1)

What is required to support a default Level 3 Discovery of application configuration and host data in IBM Tivoli Application Dependency Discovery Manager V7.2 (TADDM)?

- A. Operating system credentials must be created on each computer system.
- B. Application and operating system credentials must be created for TADDM and added to the access list.
- C. The optional NMAP tool must be installed and configured on all TADDM domain servers and on all anchor servers.
- D. A service account must be created on all computer systems that are discovered using SSH key-based and password-based connections.

Answer: B

Question No : 12 - (Topic 1)

What must be defined to run a default Level 1 Discovery?

- A. Only an access list.
- B. Only a discovery scope.
- C. A discovery scope and an access list.
- D. A discovery scope, an access list, and a schedule.

Answer: B

Question No : 13 - (Topic 1)

An anchor server behind a firewall can be used for deploying which three sensors?
(Choose three.)

- A. PixSensor
- B. AsdSensor
- C. SysControlSensor
- D. UtilizationSensor
- E. OptimizationSensor
- F. ZonesGenericSensor

Answer: A,C,F

Question No : 14 - (Topic 1)

Which statement is true regarding IBM Tivoli Application Dependency Discovery Manager V7.2 anchors on Windows hosts running CYGWIN OpenSSH?

- A. Only Bitwise WinSSHD is supported.
- B. A Windows host cannot be an anchor.
- C. CYGWIN OpenSSH must allow port forwarding.
- D. CYGWIN OpenSSH cannot be allowed to forward ports.

Answer: C

Question No : 15 - (Topic 1)

Which IBM DB2 utility eliminates fragmentation and reclaims space?

- A. REORG
- B. RUNSTATS
- C. STOSPACE
- D. BUFFERPOOL

Answer: A

Question No : 16 - (Topic 1)

Rebuilding the indexes and running the dbms_stats package is important for the optimal performance of which database?

- A. DB2
- B. SQL
- C. Derby
- D. Oracle

Answer: D

Question No : 17 - (Topic 1)

Which two prerequisites must be met before deploying the utilization sensor in Linux and Solaris? (Choose two.)

- A. The sar command must be available.
- B. The lsof command must be available.
- C. The netstat command must be available.
- D. The utilization metric table must be created with the support script after CMDB creation.
- E. The IBM Tivoli Application Dependency Discovery Manager V7.2 service account should have SUDO privilege.

Answer: A,C

Question No : 18 - (Topic 1)

Which command can be executed on an IBM Tivoli Application Dependency Discovery Manager server to verify that WMI has been correctly configured on a Windows gateway server?

- A. execgw.jy/execgw.bat
- B. execwmi.jy/execwmi.bat
- C. testwmi.jy/testwmi.bat

D. wmitest.py/wmitest.bat

Answer: C

Question No : 19 - (Topic 1)

Which command initiates uninstalling IBM Tivoli Application Dependency Discovery Manager V7.2 from the Proof of Concept server to make it ready for production?

- A. rmdir
- B. uninstall
- C. deinstall
- D. install shield -remove

Answer: B

Question No : 20 - (Topic 1)

What is the basis for the self monitoring tool of IBM Tivoli Application Dependency Discovery Manager V7.2?

- A. top
- B. WMI
- C. LoopBack interface sensor
- D. IBM Tivoli Monitoring V6.x

Answer: D

Question No : 21 - (Topic 1)

Which data model object types can application templates use to automatically create business applications?

- A. All AppServer configuration item data model types.
- B. All configuration item types defined in the common data model.
- C. Configuration items discovered through custom server templates.
- D. All ComputerSystem and AppServer configuration item data model types.

Answer: C

Question No : 22 - (Topic 1)

Which condition could occur during a discovery if the correct authentication method is not defined or identified?

- A. The discovery hangs.
- B. User account lockouts.
- C. The discovery completes normally.
- D. Improper configuration information.

Answer: B

Question No : 23 - (Topic 1)

An IBM Tivoli Application Dependency Discovery Manager V7.2 (TADDM) server has been installed on the network with a static IP address of 10.76.130.42. Which URL is used to access the web-based TADDM console?

- A. http://10.76.130.42
- B. http://10.76.130.42:9430/
- C. http://10.76.130.42/Console
- D. http://10.76.130.42:9430/TADDM

Answer: B

Question No : 24 - (Topic 1)

If a customer wants to discover a Microsoft Exchange Server running on a Windows server using default Level 3 Discovery, which access credentials in the IBM Tivoli Application Dependency Discovery Manager V7.2 (TADDM) access list will allow discovery of the Microsoft Exchange Server?

- A. User name and password of an administrator for the Microsoft Exchange Server should be specified as Access Credentials for a Component Type 'Mail Servers' in the Access List.
- B. Component Type 'Messaging Servers' with Vendor 'Microsoft Exchange Server' when
