000-723

IBM WebSphere Commerce V7.0, Application Development

Version 23.7

000-723

QUESTION NO: 1

An application developer notices that a policy that is expected to grant access appears in the trace, however it is not being applied. In addition an error similar to the following example is logged to the trace.log file.

```
PolicyManagerImpl.isAllowed isAllowed? User=510;  
Action=Execute;  
Protectable=com.ibm.commerce.catalog.commands.ProductDisplayCmdImpl;  
Owner=2002; Resource Ancestor Orgs=2002,-2001; Resource Applicable Orgs=2002  
PolicyManagerImpl.isAllowed Found PolicyName:AllUsersExecuteResellerUserCmdResourceGroup;  
PolicyType: 3; PolicyOwner: -2001  
PolicyManagerImpl.getPolicyApplicableOrgs  
No organizations subscribe to a policy group with this policy  
PolicyManagerImpl.isAllowed Policy does not apply to the resource's applicable organizations  
...  
PolicyManagerImpl.isAllowed  
PASSED? =false
```

Apart from ensuring that the resource owner is subscribing to the correct policy groups and subscribing the organization to the policy group, what are the correct values to insert into the ACPLGPSUBS table?

A. orgentity_id = 2002 and acpolgrp_id = 10001(ManagementAndAdministrationPolicyGroup) and orgentity_id = 2002 and acpolgrp_id =10003

(CommonShoppingPolicyGroup)

B. orgentity_id = -2001 and acpolgrp_id = 10001(ManagementAndAdministrationPolicyGroup) and orgentity_id = -2001 and acpolgrp_id =10003

(CommonShoppingPolicyGroup)

C. orgentity_id = -2001 and acpolgrp_id = 10001(ManagementAndAdministrationPolicyGroup)and orgentity_id = 2002 and acpolgrp_id =10003

(CommonShoppingPolicyGroup)

D. orgentity_id = 2002 and acpolgrp_id = 10001(ManagementAndAdministrationPolicyGroup)and orgentity_id = -2001 and acpolgrp_id =10003

(CommonShoppingPolicyGroup)

Answer: A

QUESTION NO: 2

000-723

When running a JUnit test case for a Business Object Document (BOD) in WebSphere Commerce Developer, which feature of Rational Application Developer will allow the application developer to view the request and response documents?

- A. Console
- B. Code Coverage
- C. TCP/IP Monitor
- D. Software Analyzer

Answer: C

QUESTION NO: 3

In what format are test cases written to test Management Center using the test automation framework?

- A. XML file
- B. ANT script
- C. JUnit class
- D. OpenLaszlo class

Answer: A

QUESTION NO: 4

An application developer wants to develop new commands and refers to the Information Center documentation to understand how the commands and tasks are mapped to the table. Under which section would this information be found?

- A. Reference

000-723

- B. Tutorials
- C. Developing
- D. IBM Education Assistant

Answer: A

QUESTION NO: 5

An application developer has customized the login functionality of the Madisons starter store and needs to unit test the customization using the Storefront Test Automation Engine.

If the unit test has to be performed with two different data sets (e.g., user1 / password1, user2 / password2), how should the application developer include the test data in the test case?

- A. Include the test data in an XML data file.
- B. Include both data sets in a single test automation script.
- C. For each data set write a separate test automation script.
- D. Invoke the test automation script from a command line and provide test data as command line parameters.

Answer: A

QUESTION NO: 6

After running the data load utility, the application developer notices an error similar to the following:

000-723

An error occurred while attempting to populate the table ITEMSPC because the mandatory parameter ParentProductIdentifier was missing.

The ID was not resolved for the table ITEMSPC with the unique index data [**DL_PROD1_SKU1, 7000000000000000054**].

Stack trace:

```
com.ibm.commerce.foundation.dataload.exception.DataLoadApplicationException: The ID was not resolved for the
table ITEMSPC with the unique index data [DL_PROD1_SKU1, 7000000000000000054].
    at
com.ibm.commerce.foundation.dataload.idresolve.IDResolverForOneTable.resolveId(IDResolverForOneTable.java:336)
    at com.ibm.commerce.foundation.dataload.idresolve.IDResolverImpl.resolveId(IDResolverImpl.java:266)
    at com.ibm.commerce.foundation.dataload.businessobjectmediator.AbstractBusinessObjectMediator.resolveIds(
AbstractBusinessObjectMediator.java:1164)
    at com.ibm.commerce.foundation.dataload.businessobjectmediator.AbstractBusinessObjectMediator.resolveId(A
bstractBusinessObjectMediator.java:1118)
    at com.ibm.commerce.inventory.dataload.mediator.AbstractInventoryMediator.resolveItemSPCId(AbstractInvent
oryMediator.java:656)
    at com.ibm.commerce.inventory.dataload.mediator.InventoryReceiptMediator.populateRECEIPT(InventoryReceipt
Mediator.java:251)
    at com.ibm.commerce.inventory.dataload.mediator.InventoryReceiptMediator.transform(InventoryReceiptMediat
or.java:120)
<...>
```

Note: The information in bold represents variable information: 7000000000000000054 is the member_id, and DL_PROD1_SKU1 is the partnumber.

What is the cause of the error?

- A. The item id is incorrect or missing.
- B. The unique index constraint is violated.
- C. The inventory value for the product is missing.
- D. The inventory system being used is set to ATP while loading non-ATP data.

Answer: D

QUESTION NO: 7

After migrating the store assets project, the application developer notices an exception similar to the following example.

```
[12/22/09 13:13:11:859 PST] 00000012 WASSessionCor I SessionContextRegistry getSessionContext SESN0176I: Will create a new session
context for application key WC_default_host/webapp/wcs/stores
[12/22/09 13:13:13:953 PST] 00000012 ValidatorPlug I org.apache.struts.validator.ValidatorPlugin initResources Loading validation rules file
from '/WEB-INF/validator-rules.xml'
[12/22/09 13:13:35:265 PST] 00000012 TilesPlugin E org.apache.struts.tiles.TilesPlugin initDefinitionsFactory Can't create Tiles definition
factory for module ".
[12/22/09 13:13:35:265 PST] 00000012 ActionServlet E org.apache.struts.action.ActionServlet init Unable to initialize Struts ActionServlet due
to an unexpected exception or error thrown, so marking the servlet as unavailable. Most likely, this is due to an incorrect or missing library
dependency.
    javax.servlet.ServletException: org.apache.struts.tiles.DefinitionsFactoryException: IO Error while parsing file
'/WEB-INF/tiles-defs.xml'. Connection timed out.
```

Before attempting to restart the server, the application developer needs to:

000-723

- A. change the library dependency in the WEB-INF/struts-config.xml file.
- B. change the Connection Time Out value in WEB-INF/tiles-defs.xml file.
- C. modify the validation rules in /WEB-INF/validator-rules.xml file.
- D. modify the DTD version in the <!DOCTYPE> element of WEB-INF/tiles-defs.xml file.

Answer: D

QUESTION NO: 8

An application developer is creating different outbound queues for different message types while integrating with WebSphere MQ. Which method of the SendMsgCmd command must be used to set the queue destination in the custom code?

- A. setMsgData
- B. setConfigData
- C. setContentData
- D. setCommandData

Answer: B

QUESTION NO: 9

An application developer needs to ensure that multiple portlets on a page and across pages can communicate as one client with the WebSphere Commerce Server. Where in the portlet session should the authentication callback handler object and business context object be stored?

- A. contextId
- B. contextKey

000-723

- C. contextData
- D. contextService

Answer: B

QUESTION NO: 10

An application developer has created a new Social Commerce adapter implementation for a new service provider. Which of the following files must the application developer modify as part of configuring the new adapter?

- A. SocApp > config > ivy.xml
SocApp > config > adapter.config
- B. SocApp > config > ivy.xml
SocApp > config > soccom_adapter.config
- C. SocApp > config > soccom_instance.xml
SocApp > config > adapter.config
- D. SocApp > config > soccom_config.xml
SocApp > config > soccom_adapter.config

Answer: A

QUESTION NO: 11

An application developer is enabling WebSphere Application Server Security with Federated LDAP Repositories using the WebSphere Commerce Integration Wizard and WebSphere Commerce Developer. Which file must be used for setting the user Security Role, if Application Security is enabled?

- A. ibm-security-ext.xml

000-723

- B. ibm-security-bnd.xml
- C. ibm-application-bnd.xml
- D. ibm-application-ext.xml

Answer: C

QUESTION NO: 12

A customer places an order for two items that total \$300. Item A costs \$100 and is in stock. Item B costs \$200 and is not in stock but will be available in two days. The customer uses a credit card to pay for the order. If this credit card payment method uses 'Early Approval' payment rule, which among the following are TRUE?

- A. \$100 will be deposited at the time of shipment of Item A
- B. \$100 will be validated and deposited at the time of order capture
- C. \$100 will be validated and approved at the time of order capture
- D. \$300 will be validated at the time of order capture and deposited at the time of shipment of Item B
- E. \$300 will be reserved at the time of shipment of Item A and deposited at the time of shipment of Item B

Answer: A,C

QUESTION NO: 13

When using the 'No Validation or Reservation' payment rule, with 'finalize payment' event, what is the target state of payment?

- A. APPROVED
- B. DEPOSITED

000-723

- C. FINALIZED
- D. DNE (Does Not Exist)

Answer: B

QUESTION NO: 14

An application developer needs to encrypt sensitive pieces of information while integrating the Social Commerce sMash application with BazaarVoice. Which value in the adapter.config must be encrypted?

- A. adminPassword
- B. adminSecret
- C. restAdminPassword
- D. sharedKey

Answer: D

QUESTION NO: 15

An application developer has to change the style of Social Commerce widgets. What action does the application developer have to take?

- A. Modify soccomie.css and soccom.css
- B. Modify the widget definition in REST API.
- C. Modify REST API, soccom.css and soccomie.css
- D. Modify soccomie_style.css and soccom_style.css

Answer: A

000-723

QUESTION NO: 16

In the Catalog Entry data model, which table represents a family of products with a common name and description, used for fulfillment?

- A. CATENTRY
- B. CATENTTYPE
- C. BASEITEM
- D. ITEMFFMCTR

Answer: C

QUESTION NO: 17

If the requirements are as follows, which of the URLs must the application developer use?

- Check if any of the parents of the specified organization are locked.
- Check if the specified organization is the parent organization of the user. If it is not, then check whether the user assumes the Organization Participant role in the specified organization or any of its ancestors.
- Reset all contract information such that new contracts can be applied to reflect the change in the active organization.

- A. BuyerUserRegistrationUpdate URL
- B. ContractSetInSession URL
- C. OrgEntityUpdate URL
- D. OrganizationSetInSession URL

Answer: D

QUESTION NO: 18

WebSphere Commerce implements Business Object Document (BOD) processing commands to retrieve, process, modify, and synchronize data. Identify the correct verb/response mapping in the BOD.
