**Answer: B**

**Question No : 7 - (Topic 0)**

Which one of the following statements of View Logging is TRUE?

- A. It requires that the Default access be set to Designer.
- B. It sends alerts about changes users make to views.
- C. It allows designers to track changes to views locally.
- D. All updates to Notes views or folders are recorded in the transaction log for recovery purposes.

**Answer: D**

**Question No : 8 - (Topic 0)**

Susan creates a sales reporting database that has information downloaded daily from a host application.

1. Each document contains the monthly sales for 10,000 products, entered by part number.
2. Because Susan gets a complete set of data every day, her agent deletes all of the documents in the database.
3. New documents with the same part numbers are created so they are identical in the views.
4. The application is used globally and resides on many servers.

Which one of the following describes the problem this will cause?

- A. There will be a heavy replication burden.
- B. The users will not be able to easily find the same information from day to day.
- C. There will be replication conflicts because many of the documents will be exactly the same.
- D. Only 4,294,836,225 new documents can be created in a database before the number of unique UNIDs runs out.

**Answer: A**

**Question No : 9 - (Topic 0)**

Susan plans to change the forms and views of a production database. She will make the

changes locally and then update the application's design template with the changes. Which one of the following server tasks will push the new design changes from the template into the production database?

- A. ROUTE
- B. DESIGN
- C. UPDALL
- D. FIXUP - D

**Answer: B**

**Question No : 10 - (Topic 0)**

Bill wants to provide context-sensitive Help on his forms in the Video application so that users can open them by pressing the F1 key. Which one of the following best describes what Bill can do to override the default F1 context-sensitive Help of the Notes client?

- A. Write a formula for the onHelp event on the forms.
- B. Create a JavaScript applet that is embedded in the forms.
- C. Bill cannot override the default Notes client F1 Help on his forms.
- D. Enable context-sensitive Help on the database Advanced properties.

**Answer: A**

**Question No : 11 - (Topic 0)**

Jill wants to create an agent that will send a memo on behalf of her boss. However when she saves the agent it will not run on the server because she does not have the authority to create agents to run on someone else's behalf. What does Jill need to do to get the right authority?

- A. Jill need to have Manager access on the database ACL.
- B. Jill needs to be listed in the "Run unrestricted methods and operations" security field in the Server document.
- C. Jill needs to be listed in the "Sign agents to run on behalf of someone else" security field in the Server document.
- D. Jill needs to be listed in the "Sign agents to run on behalf of someone else" security field and be listed in the "Full access administrators" security field on the Server document.

**Answer: C**

**Question No : 12 - (Topic 0)**

Stella has a DB2 database that contains customer information that she wants to be able to view and modify in her e-commerce application. The application replicates to other servers on her LAN. How can Stella set up access between all the databases and the customer DB2 database?

- A. Stella cannot access data in DB2 tables.
- B. Create a data connection resource that accesses the DB2 table.
- C. Create an ODBC Data Connector that access the DB2 table.
- D. Stella must use SQL commands and the @Command function to import data into her application.

**Answer: B**

**Question No : 13 - (Topic 0)**

Jason coded and saved a scheduled Java server agent that should execute on ServerX. It does not run at all, even though he signed it with his Notes ID. Given that the Agent Manager is running on the server, which one of the following should Jason check first to diagnose the problem?

- A. Check whether an Anonymous user is allowed to run agents on the server.
- B. Check the Agent security tab to make sure that "Run as web user" is selected.
- C. Check whether Jason is in either the "restricted or "unrestricted" agents list on the server.
- D. Check whether Jason is in the "Database administrators" list on the server document

**Answer: C**

**Question No : 14 - (Topic 0)**
