

Lotus

Exam 190-711

IBM Lotus Notes Domino 7 App.Dev.Intermediate Skills

Version: 5.0

[Total Questions: 90]

Topic 0, A

A

Question No : 1 - (Topic 0)

The "Job Opportunities" database is accessed regularly by many employees at Gayla company. The database has been replicated to local servers at each of the company 20 locations. Although Gayla has created a full-text index (including the indexing of attachments) on a hub server, and verified that the hub replicates to all of the distributed servers, her users complain that searches are very slow, and that they are unable to use the "Fill out example form" search feature that they CAN use in some other databases. What could be done to fix this problem?

- A. Gayla needs to click the "Create index" button on the Full Text tab of the database Properties on each of the replica databases.
- B. Gayla needs to select the "Replicate view search indices" parameter on the database Properties Advanced tab on each of the replica databases.
- C. The Notes administrator needs to increase the number of minutes specified by the ReplicationTimeLimit parameter in the hub server Notes.ini file.
- D. Gayla needs to select the "Replicate view search indices" parameter on the database Properties Advanced tab on the database on the hub server.

Answer: A**Question No : 2 - (Topic 0)**

Which items contain data types stored as summary data by default?

- A. Text, number, date/time, reader names
- B. Text, text lists, rich text
- C. All data types are stored in the summary buffer.
- D. Rich text, file attachments, embedded OLE objects

Answer: A**Question No : 3 - (Topic 0)**

John is developing an application that will reside on multiple servers. He wants to be able to locate one particular document across all database replicas. Which ID will allow him to locate that document?

- A. DocumentID
- B. ReclD
- C. NoteID
- D. UNID

Answer: D

Question No : 4 - (Topic 0)

Norah is designing the navigation for her Notes application. She would like to present the user with a navigation area on the left and a content area on the right. In the navigation area, Norah would like to provide links to views, with some of the views organized inside of collapsed folders. She would also like to include links for common actions, such as creating a new document, and would like to use custom icons for the actions. Can this be done?

- A.** Yes. Create an outline for the navigation, including links for views and actions. Include the outline in a page, and the page within the left-hand frame of a frameset. The right-hand frame will hold the content. The outline entries can be assigned custom images for the icons.
- B.** No. Most of the intended navigation can be built using outlines, pages, frames, and framesets. One can customize much of the appearance of the navigation, but the icon graphics must be selected from those provided in the notes\data\domino\icons folder.
- C.** Yes. Create a Notes Navigator object with an image bitmap for the navigation, placing an embedded editor on the right for the content. The Navigator object allows one to create clickable areas on the image, linking to views or serving as hotspots for actions.
- D.** No. Most of this could be done in the past by creating a Notes Navigator object, but Navigators are no longer supported. Pages, Frames, and Framesets are for web applications; the rendering of the display for these objects in the Notes client is unpredictable.

Answer: A

Question No : 5 - (Topic 0)

Hans and Kristen, two mobile users, are editing different fields in the same document during a parallel review. The designer set a form property to merge replication conflicts. What will happen?

- A.** Edits to each field will be saved in a single document.
- B.** Edits to both fields will be saved in two identical main documents.
- C.** Edits to both fields will be saved in a single document marked as a replication conflict.

D. Edits to each field will be saved in two documents: one a main document and the other a response document marked as a replication conflict.

Answer: A

Question No : 6 - (Topic 0)

The graphics department has sent Horacio a JPEG image to be used as the icon for his new database. What should Horacio do so that this image appears as the database icon?

- A. Use a graphics program to convert the image to a 16x16 pixel GIF. Copy the GIF to the Clipboard. Open the database in Domino Designer, and in the Design pane, click Other > Database Resources. Double-click Icon, and then click Paste.
- B. Use a graphics program to convert the image to a 32x32 pixel GIF. Open the database in Domino Designer, and in the Design pane, click Shared Resources > Images. Click "New Image Resource", and select the filename of the image. In the Design pane, click Other > Database Resources. Double-click Icon, click "Select from Image Resource", and select the image.
- C. Use a graphics program to convert the image to a 16x16 or larger square image. Open the database in Domino Designer, and in the Design pane, click Shared Resources > Images. Click "New Image Resource", and select the filename of the image. In the Design pane, click Other > Database Resources. Double-click Icon, click "Select from Image Resource", and select the image.
- D. Use a graphics program to convert the image to a 32x32 pixel bitmap. Copy the bitmap to the Clipboard. Open the database in Domino Designer, and in the Design pane, click Other > Database Resources. Double-click Icon, and then click Paste.

Answer: D

Question No : 7 - (Topic 0)

Enrique would like to add a Cancel Edit button to his form so that users have a quick way to close a document without saving their changes. Which formula should he use in the form action?

- A. FIELD SaveOptions := 1; @Command([FileCloseWindow])
- B. FIELD SaveOptions := 0; @Command([CloseWindow])
- C. SaveOptions := "1"; @CloseWindow
- D. SaveOptions := "0"; @Command([FileCloseWindow])

Answer: B

Question No : 8 - (Topic 0)

In Domino Designer, Casey has opened the list of forms in his application. He has selected several forms and has opened the properties dialog box for the multiple design elements. Which settings can he control from this dialog box?

- A. Hide the forms based on a formula.
- B. Add a comment about the selected forms.
- C. Enable/Disable the "Include Search Builder" form setting.
- D. Enable/Disable the "Prohibit design refresh or replace to modify" setting.

Answer: D

Question No : 9 - (Topic 0)

Cindy locked a design element and left on vacation. The design element has to be changed. Who can change it?

- A. Only Cindy
- B. Anyone with Designer access or higher
- C. Only those with Manager access
- D. Anyone with Editor access or higher

Answer: B

Question No : 10 - (Topic 0)

Andre has hidden the design of a database. Which one of the following describes how to re-sign the database with a different ID?

- A. Once the design of a database has been hidden, the database cannot be re-signed.
- B. Sign the design template using the new ID, and replace the design of the database with this template.
- C. Make a copy of the database without the ACL. This will unhide the design, and allow re-signing.
- D. Deselect the 'Hide formulas and LotusScript' database property and re-sign the database.

Answer: B

Question No : 11 - (Topic 0)

Joan wants to create an agent that will send a memo on behalf of her boss. However, when she saves the agent, it will not run on the server because she does not have the authority to create agents to run on someone else's behalf. What does Joan need to do to get the right authority?

- A. Joan needs to have Manager access on the database ACL.
- B. Joan needs to be listed in the "Run unrestricted methods and operations" security field in the Server document.
- C. Joan needs to be listed in the "Sign agents to run on behalf of someone else" security field in the Server document.
- D. Joan needs to be listed in the "Sign agents to run on behalf of someone else" security field and be listed in the "Full access administrators" security field on the Server document.

Answer: C

Question No : 12 - (Topic 0)

Bill wants to provide context-sensitive Help in his forms in a Video application so that users can open them by pressing the F1 key. Which one of the following best describes what Bill can do to override the default F1 context-sensitive Help of the Notes client?

- A. Write a formula for the onHelp event on the forms.
- B. Create a JavaScript applet that is embedded in the forms.
- C. Bill cannot override the default Notes client F1 Help on his forms.
- D. Enable context-sensitive Help on the database Advanced properties.

Answer: A

Question No : 13 - (Topic 0)

The XYZ Company has offices in many different countries. There is a single Inventory database, replicated to a server in each country. Users connect to the server associated with the country in which they work. Each Product document includes a multivalue field named Country, indicating the country or countries in which the product is available. How can Drew ensure that the server in each country is only sent the data for products for sale

within that country?

- A. On the Security tab of the Properties for each country replica database, select "Restricted replication". Select "Restrict by formula". Type the replication formula: SELECT @IsMember("COUNTRY_NAME"; Country)
- B. On the Advanced tab of the Replication Settings for each country replica database, select "Documents by selection formula", and type the formula: SELECT @IsMember("COUNTRY_NAME"; Country)
- C. Add a computed Authors field to the Product forms in the database. Use a value formula of "Country". Run an agent to refresh all documents.
- D. On the Defaults tab of the Properties for the Product form, select "by formula" under "Restrict copying". Type the formula: SELECT @IsMember(@Location("1"); Country)

Answer: B

Question No : 14 - (Topic 0)

Fred has been receiving a number of support calls from users who have customized the Monthly Sales view. They have reordered and resized columns and set color options to the point where the view is hard to use. What can Fred do to prevent these problems in the future?

- A. Deselect the "Editable column" option on the column properties for each column that needs to retain its formatting.
- B. Deselect the "Allow customizations" option on the Info tab of the view properties.
- C. Deselect the "Resizable" option on the column properties for each column that needs to retain its formatting, and delete the hidden columns that have the "Use value as color" option selected.
- D. Ask the Notes administrators to push a profile to the users to lock the "Disable View updates as a background task" as selected, and the "Retain View column sorting" as deselected in User Preferences.

Answer: B

Question No : 15 - (Topic 0)

Kristin wants to create a button to display one page that will remain constant as users scroll or link to other pages. Which @Command should Kristin use in the button?

- A. @Command([OpenPage])
- B. @Command([OpenFrame])
- C. @Command([OpenFrameset])
