Console Root Citrix Access Suite Console Alerts Search Results Wy Views Licensing Citrix Access Gateway Configuration Tools Co	Name Ctrix Access Suite Console

TestInsides.com users access resources using a variety of client devices, some clinic-owned and some personal. A number of applications in the current environment are not running correctly on certain types of client devices, causing a steady increase in support calls to the Help Desk. The Clinic CIO wants to limit the client devices that can be used to access resources. Because only client devices that can support all of the currently installed applications are members of the TestInsidesAC domain, limiting access to only domain-member devices should solve the problem.

You are requested to create a scan named "TestInsidesAC Domain" that does the following:

* Ensures only client devices which are members of the TestInsidesAC domain can be used to access resources.

* Runs for the AllUsers logon point.

* Runs against all client devices regardless of the operating system being used on the client device.

Explanation:

1. Create Endpoint Analysis / Machine Identification Scans / Citrix Scans for Domain Membership

Castan Scane	Property	Description	Paraveter Bane
E Gar Prevel Score Gar Nethern behaftstate Scare E By Color Scare for Donien Menbesho E By TreatingAC. ▲ NUCL	Pine Testkagal	A dent device dowain some is required (workgroup names are not acceptable) Name supported for dowain.	www.pass4sures.com

2. Apply to Logon Point

lame ielect Home Page suthentication	Allow external (gateway appliance) users access to this logon point. If not set, only internal users will have access to this logon point. This option must be set on the default logon point.
utherization Presentation Server Farms iound and Window Settings	 Show logan page. If conditions are defined below, the logan page displays only when these conditions are met. Insert items to build a logical expression of conditions.

QUESTION NO: 2

Simulation Exhibit:

TestInsides Gmbh. Currently uses LDAP for both authentication and authorization through their Citrix Access Gateway Advanced Edition 4.2 deployment. They have just purchased RSA Tokens for external users in order to improve access security. As part of this upgrade in security, the IT team has decided to use Active Directory for primary authentication and authorization.

You are required to perform the following tasks: Enable all users to use Active Directory for authentication and authorization. External users will be required to use RSA Tokens for secondary authentication

Explanation:

1. Edit Logon Point

QUESTION NO: 3

Simulation Exhibit:

TestInsides.com is using Access Gateway Advanced Edition to control access to the file shares, <u>network resources and email in the TestInsides.com corporate office TestInsides.com wants to be</u> <u>http://www.maitiku.com QQ:860424807</u>
⁵

able to improve communication among managers and clerks by providing them access to important corporate information using an internal web site. Because managers and clerks will be using computers which are unsecured to access the information, an additional layer of authentication is required. The users of the site should be able to browse to the URL for the site from external locations whenever needed.

You are required to perform the following tasks: The name of the web site must be TestInsides NewsThe web site must be listed on the navigation page of the managers and clerksThe web site uses cookies and requires NTLM authenticationThe actual URL of the site should b visible to the usersThe default policy created during the creating of this resource must be edited to allow only managers and clerks to access the web site.

Explanation:

Create Web Resources / Select Bypass Web Proxy URL rewriting

URL: http://TestKing News		
Application type:		
Web Application (requires	session cookies)	-
Authentication types supp <u>Basic</u> (password is s <u>Digest</u> authentication	ent in clear text)	
Integrated Windows	authentication	
	1.22	

QUESTION NO: 4

Simulation Exhibit:

TestInsides.com is using Access Gateway Advanced Edition 4.2 to control access to the resources stored on servers at the office. Attorneys and their associates want to be able to securely access their legal briefs and the Legal Reference Library on the servers at the office so they can make updates to the briefs as necessary from both inside and outside the office.

You are required to perform the following tasks:

* A single file share resource named "PM Legal Resources" must be used to make both file shares available through Access Gateway Advanced Edition.

* Both the \\PM\LegalBriefs and \\PM\LegalRefLibrary file shares must be accessible.

* The file shares must be listed on the navigation page for the Attorneys and the Associates user groups, but not on the navigation page for the Clerks user group.

* The file shares must be available only when accessed through the existing Legal logon point.

Explanation:

Use Access Suite / Resources / Create File Shares and create default Policy

Edit the Policy / Apply to Legal Logon Point / Select Users (Associates user groups and Attorneys)

Name	Apply this policy to all authenticated users	
Resource Settings	Choose users from the selected authority:	
Filter	Active Directory	
Select Users	Add	
	Selected users:	www.pass4sures.com

QUESTION NO: 5

You work as a network Administrator at TestInsides.com. You have recently installed Access Gateway Advanced Edition. You have configured several login points in the Access Suite Console for internal and external access into the environment. Now you want to use the logon points to access specific Presentation Server farms.

What can you edit to specify the Presentation Server farms?

- A. The farm properties.
- B. The Gateway Appliance node
- C. The logon points
- D. The Access Gateway node
- E. The server properties

Answer: C

Explanation:

Name	Available larms:	6
Select Home Page	Farm Name	
Authentication		
Authorization		
Presentation Server Farms		Ne <u>w</u>
Sound and Window Settings		
Workspace Control	- Add - Bemove	1
Clients		
Session Settings	Selected farms, in order of preference:	
Visibility	Farm Name	1 1000 1000 1
	Classroom	▲ Up

QUESTION NO: 6

Simulation Exhibit:

You work as a network Administrator at TestInsides.com. You have completed the implementation of the Access Gateway Advanced Edition 4.2 in a test environment. Use the simulation exhibit

http://www.maitiku.com QQ:860424807

(Note: further simulation information is not available within this questions) to decide if the following statement is true or not.

Statement: Policies and split tunneling are configured to allow members of the External Users group to synchronize their Exchange based e-mail through the Access Gateway appliance. TrueFalse

Explanation:

Check Resources / Email Synchronization / Check the Policy that is applied to External Users Logon Point

Configure Email Synchronia	zation		
CITRIX			
Configure Email Synchronization If you configure your email application for email synchronization, you can create policies that allow users to synchronize their email accounts.			
Steps Configure Email Synchronization Add Policy	 Enable email synchronization Microsoft Exchange Server names or addresses: Ites: 		

Check the Logon Point Policy Filter

Name	Edicy Settings	400000	
Resource	Settings	Value	*
etting:	Upload	Allow
