QUESTION NO: 3

For purposes of granting restricted access to statically configure iSCSI virtual targets, when three of these can be used to identify iSCSI? (Choose three)

- A. iSCSI node name
- B. hostname
- C. IPv4 address and subnet
- D. MAC address

E. IPV6 address

Answer: A,C,E

Explanation:

QUESTION NO: 4

When configuring VLANs on the FWSM, how are VLANs associated with contexts?

- A. Associated with the physical FWSM
- B. directly associated with a single context
- C. directly associated with multiple contexts
- D. associated with VLAN groups that are associated with a single context
- E. associated with VLAN groups that are associated with multiple contexts

Answer: C

Explanation:

QUESTION NO: 5

How many paths can be considered in NX-OX for equal-cost multipathing?

- A. 4
- B. 8
- C. 12
- D. 16

Answer: D

Explanation:

QUESTION NO: 6

Which features detect hardware faults and attempts recovery action?

- A. Switch health analysis
- B. Fabric configuration analysis
- C. Online health management system
- D. End-to-End connectivity analysis
- E. Cisco fabric services

Answer: C

Explanation:

QUESTION NO: 7

A customer has some performance problems in their SAN environment. They want to use a Cisco MDS 9000 Port Analyzer Adapter to connect to the Cisco MDS Switch to troubleshoot the performance problems. Which two options need to be configured on the MDS Switch? (Choose two)

- A. Put the port into the proper zone that will be monitored.
- B. Set the port speed to the value corresponding with the PAA setting
- C. Put the port in SD port mode.
- D. Configure any port channel necessary
- E. Turn off flow control

Answer: B,C

Explanation:

QUESTION NO: 8

Which second-generation Fibre Channel module offers a full 4 GB/s line rate on all ports?

- A. 12-port 1/2/4 Gb/s Fibre Channel module
- B. 24-port 1/2/4 Gb/s Fibre Channel module
- C. 24-port 1/2/4/8 Gb/s Fibre Channel module
- D. 48-port 1/2/4 Gb/s Fibre Channel module

Answer: A

Explanation:

QUESTION NO: 9

What is the grace period in a graceful restart situation?

- A. how long the supervisor waits for NSF replies
- B. how often graceful restart messages are sent after a switchover
- C. how long NSF-aware neighbors should wait after a graceful restart has started before tearing down adjacencies

D. how long the NSF-capable switch should wait after a graceful restart has started before tearing down adjacencies

Answer: C

QUESTION NO: 10

When using the Cisco MDS 9000 Switches, which protocol provides in-band management?

- A. FCIP
- B. IPFC
- C. iSCSI
- D. SNMP

Answer: B

Explanation:

QUESTION NO: 11

Which two of the following are valid SPAN sources in a Cisco Nexus 7000switch?

(Choose two)

- A. PVLANS
- B. subinterfaces
- C. tunnel interfaces
- D. SPAN destination ports
- E. supervisor in-band management interface

Answer: A,E

Explanation:

QUESTION NO: 12

You are setting up a Cisco Catalyst 4900 Series Switch, and would like to be able to do two things: enable tracking for interface GigabitEthernet 3/20 in VRRPgroup3
