Exam 9L0-406

Mac Integration Basics 10.7 Exam

Version: 6.0

[Total Questions: 45]

Question No : 1

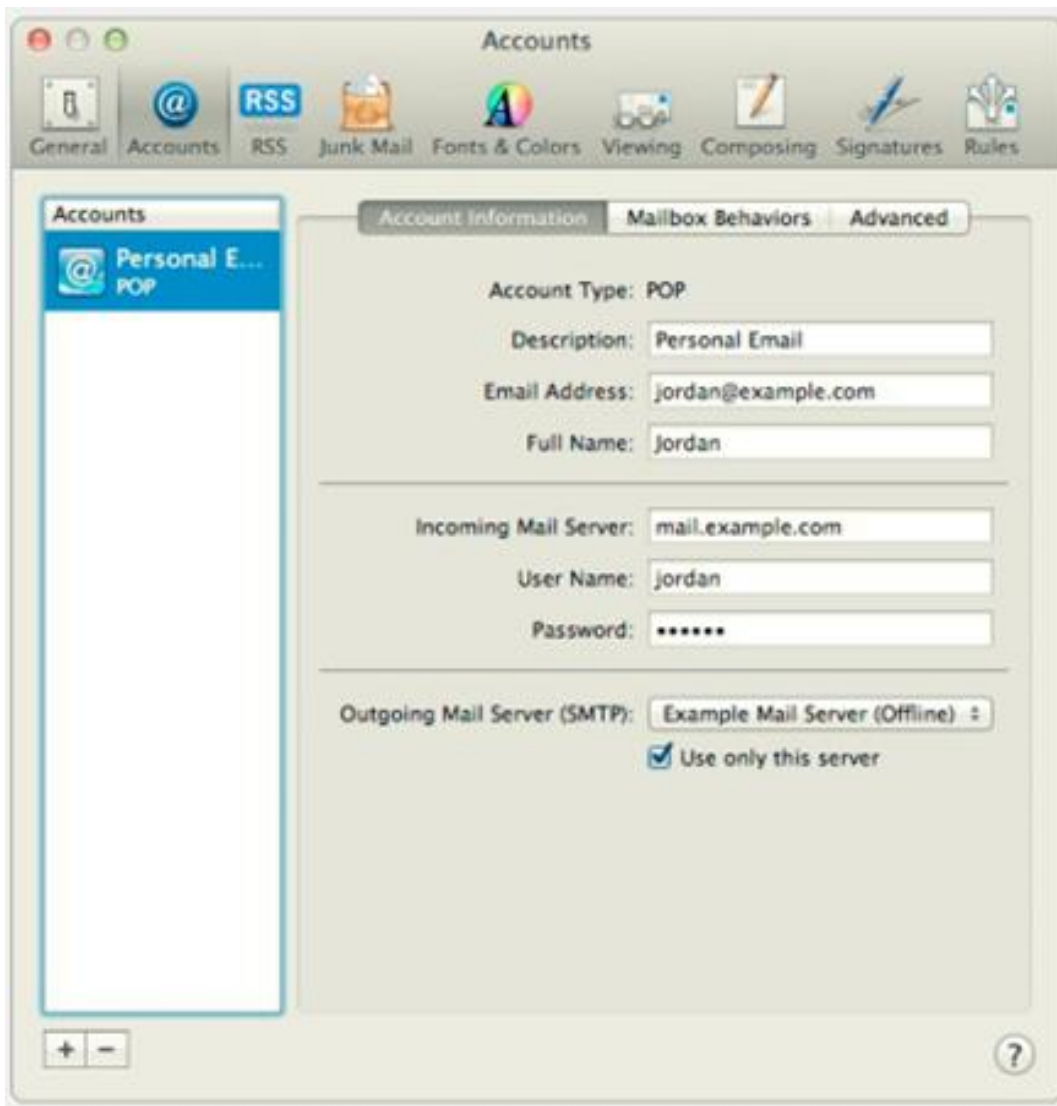

Diego wants to run a Windows-based application on a MacBook Pro. What is a valid reason for him to use Boot Camp to do so, rather than a virtual solution, like Parallels or VMWare Fusion?

- A.** Boot Camp lets Diego switch between OS X and Windows applications instantly, whereas virtual solutions require Diego to restart his MacBook Pro in order to switch between the two environments and their applications.
- B.** Boot Camp does NOT require Diego to buy and install Windows in order to run Windows-based applications, whereas virtual solutions do.
- C.** Boot Camp runs natively without hardware-resource contention on Mac computers, so Diego will see better overall performance with Boot Camp than with virtual solutions.
- D.** Diego can buy Boot Camp on the App Store for \$9.99, which is less expensive than the virtual solutions.

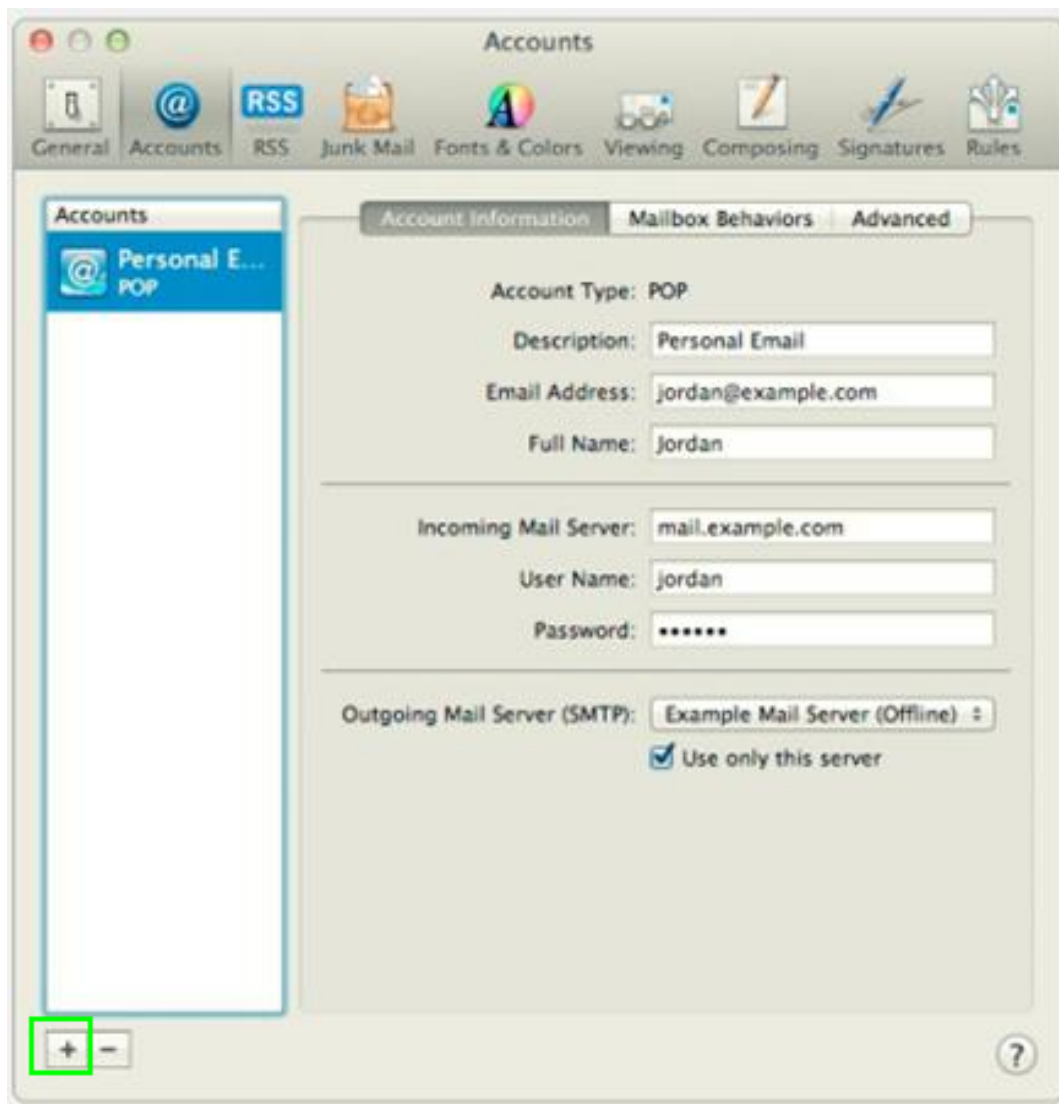

Answer: C

Question No : 2 HOTSPOT

You are configuring your Mac to get mail from a Microsoft Exchange Server computer that has Autodiscover turned on. in the screenshot, click the interface element that lets you create a new Mail account where you can provide the information to access a Microsoft Exchange Server account.
