

Apple

Exam 9L0-625

ACTC 10.6 certification + Mac OS X Security and Mobility 10.6 Exam

Version: 6.0

[Total Questions: 71]

Question No : 1

Which statement describes how port forwarding is implemented by the NAT service in Mac OS X Server v10.6?

- A.** The <redirect_port> attributes specified in /etc/nat/natd.conf.apple are used to generate the /etc/nat/natd.plist file, which is loaded by the NAT daemon when the file is saved.
- B.** The <redirect_port> attributes in /etc/nat/natd.plist are used to generate the /etc/nat/natd.conf.apple file, which is passed to the NAT daemon when the NAT service is started.
- C.** The Port Forward options specified in Server Admin for the NAT service are written to /etc/nat/natd.plist, and are passed to the NAT daemon when the NAT service is started.
- D.** The Port Forward options specified in Server Admin for the NAT service are written to the /etc/nat/natd.conf.apple file, which is loaded by the NAT daemon when the file is saved.

Answer: B

Question No : 2

When a client computer requests an IP address from a Mac OS X Server, in what order do the primary entries in the DHCP log file on the server occur?

- A.** 1. DHCP DISCOVER 2. OFFER 3. DHCP REQUEST 4. ACK
- B.** 1. DHCP DISCOVER 2. DHCP REQUEST 3. OFFER 4. ACK
- C.** 1. DHCP REQUEST 2. DHCP DISCOVER 3. ACK 4. OFFER
- D.** 1. DHCP REQUEST 2. ACK 3. DHCP DISCOVER 4. OFFER

Answer: A

Question No : 3

Which tool in the iPhone SDK lets developers write and compile native applications for the iPhone?

- A.** Xcode
- B.** Dashcode
- C.** Instruments
- D.** Interface Builder

Answer: A

Question No : 4

On a Mac OS X Server v10.6 computer you configure a firewall that allows web service for the IP address range 10.1.7.6/24 only. Which THREE addresses below will be DENIED access to the web server?(Choose THREE - partial credit possible.)

- A. 10.1.7.6
- B. 10.1.7.8
- C. 10.1.7.24
- D. 10.1.9.6
- E. 10.2.7.6
- F. 17.1.7.6

Answer: D,E,F

Question No : 5

Which service on Mac OS X Server provides support for 802.1X-based network access control?

- A. NAT
- B. VPN
- C. Firewall
- D. RADIUS

Answer: D

Question No : 6

In Mac OS X Server v10.6, when you use Server Admin to enable the NAT service with default settings, which of the following occurs?

- A. A packet divert rule is added to the firewall configuration.
- B. <redirect_port> entries are added to the natd.plist file for all other services that are enabled on the NAT services computer.

- C. <redirect_port> entries are added to the natd.conf.apple file for all other services that are enabled on the NAT services computer.
- D. The Firewall service is disabled and all traffic through the firewall server's network interfaces is re-routed through the NAT service daemon.

Answer: A

Question No : 7

Which of these is the path to the VPN service log file on a Mac OS X Server computer?

- A. /var/log/ppp.log
- B. /var/log/ppp/vpnd.log
- C. /Library/Logs/vpn.log
- D. /Library/Logs/vpnd.log

Answer: B

Question No : 8

How can you display a list of the computers that have received a lease from the DHCP service running on a Mac OS X Server computer?

- A. In Server Admin, select the DHCP service, and click Clients.
- B. In Terminal, type `sudo serveradmin status dhcp` and press Return.
- C. In Server Preferences, select Logs, and choose DHCP from the View pop-up menu.
- D. In Network Utility, click the Netstat tab, choose "Display the state of all current socket connections", and click the Netstat button.

Answer: A

Question No : 9

Which of these statements about the adaptive firewall in Mac OS X Server v10.6 is true?

- A. A firewall rule is created for all signed applications on the Mac OS X Server computer.
- B. A firewall rule is dynamically created for each service enabled on the Mac OS X Server

computer.

C. A firewall rule is dynamically generated when a user accesses services provided by the Mac OS X Server computer.

D. A firewall rule is created on the Mac OS X Server computer to temporarily block the IP address of a user's computer after the user's tenth failed attempt to log in to the server.

Answer: D

Question No : 10

Which information is stored in the `/etc/dns/` folder on a Mac OS X Server v10.6 computer?

A. Cache files for zone transfers

B. Cache files for forward zones

C. Zone files for the named process

D. Config files that contain directives for the DNS daemon

Answer: D

Question No : 11

Using Server Admin on a Mac OS X Server v10.6 computer, you create and save a primary zone for the `pretendco.com` domain on the `192.168.1/24` subnet.

Which file contains the DNS record that maps a hostname in the `pretendco.com` domain to an IPv4 address?

A. `db.pretendco.com.zone`

B. `db.pretendco.com.zone.apple`

C. `db.1.168.192.in-addr.arpa.zone`

D. `db.1.168.192.in-addr.arpa.zone.apple`

Answer: B
