

IBM

Exam C2010-571

IBM Tivoli Process Automation Engine V7.5 Implementation

Version: 7.2

[Total Questions: 280]

Topic 1, Volume A**Question No : 1 - (Topic 1)**

Which statement is true about asynchronous data validation?

- A. Data in a field is immediately validated when a user moves off of the field.
- B. Background validation is required to be active when a screen reader is being used.
- C. To be used, asynchronous data validation must be enabled for all fields of an application.
- D. To enable asynchronous data validation for all applications, add the statement ASYNCHRONOUS = 'Y' to the PRESENTATIONXML file.

Answer: A

Question No : 2 - (Topic 1)

Where is Application Server security enabled?

- A. Security application
- B. Maximo.properties file
- C. Mxserver.properties file
- D. System Configuration application

Answer: B

Question No : 3 - (Topic 1)

How are the new settings for the log level refreshed and applied?

- A. Restart the Web server
- B. Log out completely and then log in again
- C. Log in as MAXADMIN and restart the log service
- D. Perform the Apply Settings action in the Logging application

Answer: D

Question No : 4 - (Topic 1)

What is a reason to use the Database Configuration application?

- A. It is used to invoke the integrity Checker application.
- B. It is used to view or change the current number of tax types that are used.
- C. The set of synonym values for a given attribute is constructed in the Database Configuration application.
- D. The Maximo security group required to access a given Maximo business object is configured using the Database Configuration application.

Answer: B

Question No : 5 - (Topic 1)

What is the main purpose of a cron task?

- A. To set up the workflow clock
- B. To run scheduled jobs or tasks
- C. To synchronize the scheduled jobs with the current job plans
- D. To synchronize the Currency application with the Exchange Ratio variable

Answer: B

Question No : 6 - (Topic 1)

What does the Reference Count field count in a conditional expression record?

- A. The number of conditional expressions used
- B. The number of versions for a specific expression
- C. The number of times the expression has been modified
- D. The number of times the condition is used throughout the system

Answer: D

Question No : 7 - (Topic 1)

What are acceptable variable types in condition expressions?

- A. Substitution and bind
- B. Substitution and fixed
- C. Replacement and bind
- D. Replacement and fixed

Answer: C

Question No : 8 - (Topic 1)

Which statement describes the usage of the Conditional Expression Manager?

- A. To set user database permissions
- B. To set organizational communication templates
- C. To set and control the generation of ad hoc reports
- D. To set and control access to fields, tabs, and applications

Answer: D

Question No : 9 - (Topic 1)

How are Tivoli process automation engine (Tpae) languages installed?

- A. Select languages during the Tpae installation
- B. Select languages during the maximo.ear build
- C. Select languages during the maximo.ear deployment
- D. Select languages during the Tpae language pack installation

Answer: A

Question No : 10 - (Topic 1)

A company set is required for setting up which data record?

- A. Vendors
- B. Companies
- C. Company Master
- D. Chart of Accounts

Answer: C

Question No : 11 - (Topic 1)

Where is the attached documents location defined when using IBM WebSphere Application Server and IBM HTTP Server?

- A. web.xml file
- B. httpd.conf file
- C. plugin.conf file
- D. application.xml file

Answer: B

Question No : 12 - (Topic 1)

Where can the mxs.db.fetchsize property be changed?

- A. Logging application
- B. Logging.properties file
- C. Mxserver.properties file
- D. System Propertiesapplication

Answer: D

Question No : 13 - (Topic 1)

Which statement is true about the Database Configuration application admin mode?

- A. Cron task processing continues.
- B. There is no need to shut down the admin server.
- C. Event listeners continue to receive events but go into buffer-only mode.
- D. Users with the admin security role can continue to access system applications.

Answer: B

Question No : 14 - (Topic 1)

Which field is a prerequisite before creating a new organization?

- A. Country
- B. Tax Code
- C. Description
- D. CurrencyCode

Answer: D

Question No : 15 - (Topic 1)

How are long running SQL statements monitored?

- A. Set the SQL logger to LOG and review the output in the log file
- B. Set the Root logger to DEBUG and review the output in the log file
- C. Set the mxs.db.logSQLTimeLimit properties and review the output in the log file
- D. Set the mxs.db.fetchResultLogLimit properties and review the output in the log file

Answer: C

Question No : 16 - (Topic 1)

What are three performance related properties? (Choose three.)

- A. mxs.mbocount
- B. mxs.db.SQLlog
- C. mxs.db.mboobject
- D. mxs.db.logResultSet
- E. mxs.db.logSQLTimeLimit
- F. mxs.db.fetchResultLogLimit

Answer: A,E,F

Question No : 17 - (Topic 1)

What task must be performed as part of initial data entry?

- A. Create Tool
- B. Create Craft
- C. Create Order
- D. CreateOrganization

Answer: D

Question No : 18 - (Topic 1)

Which two properties must be set for attached documents? (Choose two.)

- A. mxe.doclink.path01
- B. mxe.doclink.filetype
- C. mxe.doclink.appserver
- D. mxe.doclink.doctypes.html
- E. mxe.doclink.doctypes.defpath

Answer: A,E

Question No : 19 - (Topic 1)

Which statement is true about appenders?

- A. Logging requests can be sent to multiple destinations.
- B. Logging requests cannot be sent to multiple destinations.
- C. Appenders can only be created by inserting their name into the log.properties file.
- D. Appenders cannot be deleted because they are managed by Tivoli process automation engine V7.5.

Answer: A

Question No : 20 - (Topic 1)

How can database performance be improved?

- A. turn off all cron tasks
- B. add triggers to support user queries
- C. add indexes to support user queries
- D. configure the database to allow nulls in all columns

Answer: C

Question No : 21 - (Topic 1)

Which statement is true about Maximo applications and the Application Designer?

- A. The Application Designer is used to modify the layout of a user's Start Center.
- B. Every application has a presentation.xml file that contains all the information required to build the application's user interface.
- C. When a user starts an application, the maxapplication.xml file is retrieved from the database and is placed in the memory of the application server.
- D. To preserve data integrally, all edits of application controls such as text boxes, buttons, and tabs should be done directly in the presentation.xml file.

Answer: B

Question No : 22 - (Topic 1)

Where are General Ledger accounts created?

- A. Finance application
- B. Logging application
- C. Work Entry application
- D. Chart of Accounts application

Answer: D

Question No : 23 - (Topic 1)

Currency Codes can be used in which application?

- A. Billing application

- B. Receiving application
- C. Purchase Orders application
- D. General Ledger Accounts application

Answer: C

Question No : 24 - (Topic 1)

How is the Chart of Accounts application used?

- A. To create the links between the GL and the Organizations
- B. To create the General Ledgers (GL) for work order tracking
- C. To define the values for GL components for financial tracking
- D. To manage the user rights to access financial tracking options

Answer: C

Question No : 25 - (Topic 1)

Where are workflow processes designed?

- A. Location application
- B. Properties application
- C. Workflow Designer application
- D. Work Order Tracking application

Answer: C

Question No : 26 - (Topic 1)

Which option is available when setting password rules in the Security Controls action item?

- A. Delete excluded passwords
- B. Analyze existing passwords for strength
- C. Exclude the use of words from the data dictionary as passwords
- D. Send e-mails to users whose passwords are determined to violate new password rules

Answer: A

Question No : 27 - (Topic 1)

Which statement describes how to enable Application Server security?

- A. Make a change to the mxserver.xml file and then rebuild and redeploy the EAR files.
- B. Enable it on the J2EE platform and use the Database Configuration application to set the value of UseAppServerSecurity to 1.
- C. Enable it on the J2EE platform. Tivoli process automation engine is capable or automatically recognizing the security setting.
- D. Make a change to the maximo properties file and two web.xml files, rebuild and redeploy the EAR files, and then enable it on the J2EEplatform.

Answer: D

Question No : 28 - (Topic 1)

Which group must be changed to expand the set of initial security rights for all new users?

- A. MAXREG group
- B. MXINTADM group
- C. DEFLTREG group
- D. MAXIMOUSERS group

Answer: C

Question No : 29 - (Topic 1)

Where is application access defined?

- A. Rights application
- B. Access application
- C. Security Groups application
- D. Application Definition application

Answer: C
