

IBM

Exam C2070-991

IBM FileNet P8 V5.2.1, Deployment Professional

Version: 6.0

[Total Questions: 61]

Question No : 1

By default Content Search Services logs are stored in the \IBM\ Content Search Services\CSS Server\logs directory.

What file in this directory would you review for information, warning, and error messages that are logged during server activity?

- A. default*.log
- B. monitor*.csv
- C. adminAudit.csv
- D. p8_css_trace*.log

Answer: B

Question No : 2

A system administrator has successfully configured Content Federation Services for IBM FileNet Image Services and needs to start federating documents from Image Services to the IBM FileNet P8 Content Engine.

What is the name of the tool that is used to start federating the documents in the above scenario?

- A. Remote Admin Console
- B. Remote Xapex Interface
- C. Remote Admin Task Manager
- D. Remote Configuration Manager

Answer: B

Question No : 3

To meet the criterion “Minimum required permissions”, which three operating system users need to be added to the operating system group “cpe_appserver_install_group”? (Select three.)

- A. cpe_db_user
- B. ae_install_user
- C. cpe_install_user

- D. config_mgr_user
- E. wpxt_install_user
- F. cpe_app_server_install_user

Answer: A,C,D

Question No : 4

An insurance company has offices worldwide and makes use of the content cache areas for frequently accessed document content. Recently, the encryption key for encrypted storage area at this insurance company was compromised and a new key needs to be created.

Which of the following is true for the original content in the content cache areas?

- A. If the original content is not encrypted, the cache copy of that content will now be encrypted.
- B. If the original content is encrypted, the cache copy of the existing content will now be re-encrypted.
- C. If the original content is not encrypted, then the cache copy of that content will be removed and re-encrypted.
- D. If the original content is encrypted, then it will be re-encrypted with the new encryption key. The cache copy of that content will also be re-encrypted with the new encryption key.

Answer: C

Question No : 5

A customer is creating a new workflow system for a newly installed IBM Content Platform Engine V5.2.1.

Which two of the following options must an administrator consider for new workflow creation? (Select two.)

- A. Request forwarding must not be enabled at the site level.
- B. The customer must log on to the administration console as *ape_adminuser* to perform this task.
- C. Determine the name of the workflow system data table space and optionally the index and BLOB table spaces.
- D. Work with the database administrator to determine whether custom table spaces or file

groups are need for the workflow system database.

E. The workflow system created is in an object store that usessites in a geographically distributed environment. There is no need to configure object store request forwarding.

Answer: C,E

Question No : 6

A company plans to develop separate workflow applications for various business departments.

Which one of the following approaches should be considered in order to efficiently locate active workflows of a specific application?

- A. Create in-baskets for each workflow applications.
- B. Create a separate isolated region for each workflow application.
- C. Create a separate workflow roster for each workflow application.
- D. Create a separate application space for each workflow application.

Answer: D

Question No : 7

A consultant for a large grocery store chain needs to ensure that the IBM Case Foundation system to be installed has the ability to handle the variations in application loads as the daily activity changes across file zones. To accomplish this, a highly available and load balanced system using geographically dispersed clusters has been specified.

Which one of the following J2EE servers is supported in this configuration?

- A. RedHat WildFly
- B. Apache Geronimo
- C. Oracle GlassFish Server
- D. IBM WebSphere Application Server Network Deployment

Answer: D

Question No : 8

A consulting firm for a tire manufacture is building a new IBM Case Foundation system to handle engineering drawings and their associated approval processes. They have selected IBM WebSphere for their J2EE application server.

When installing a WebSphere Application Server, which two of the following features need to be selected? (Select two.)

- A. Modern Batch.
- B. Dynamic Scripting.
- C. EJBDeploy tool for pre-EJB 3.0 modules.
- D. Communications Enabled Applications (CEA).
- E. Stand-alone thin clients and resource adapters.

Answer: B,D

Question No : 9

The P8 administrator of a company has been asked to determine how they can configure their file storage area to increase throughput.

Which of the following options would allow them to achieve this requirement?

- A. Assign multiple file storage areas to a document class.
- B. Create a storage policy with multiple database storage areas.
- C. Create a storage policy with multiple online storage areas and each on a separate disk spindle or SAN LUN.
- D. Create a storage policy with multiple storage areas setting all but one storage area online and the rest on standby.

Answer: A
