## Exam C4070-604

### IBM System z Technical V5

Version: 6.0

[ Total Questions: 57 ]

**Question No : 1**

Which of the following includes major components needed to place an IBM zEnterprise into a Parallel Sysplex clustered environment?

- A. A coupling facility, two z/OS partitions, STP and coupling links
- B. A coupling director, a z/OS and a VSE partition, STP and coupling links
- C. A coupling director, a z/OS partition, a zBX, STP and coupling connectors
- D. A coupling facility, a z/OS and an AIX partition, STP and coupling connectors

**Answer: A**

**Question No : 2**

A System z customer is planning to move their data center with several existing System z servers to a new space without a raised floor. Which of the following requirements should the technical specialist discuss with the customer?

- A. Ordering the height reduction feature if needed
- B. Top Exit Cabling Option is required for all the CPCs
- C. Confirm all the System z servers are z9 BC, z10 BC or z114
- D. Confirm the new installation is compliant with the Installation Manual for Physical Plugging

**Answer: C**

**Question No : 3**

A customer is considering a z196 with a zBX. Which of the following is the best action a specialist could take to ensure customer satisfaction?

- A. Conduct a "Fit for Purpose Study"
- B. Conduct a z/VM Implementation Workshop
- C. Mentor the customer on installing PowerVM and VMware
- D. Review the hardware support process and the HMC documentation for the z196 CPC and the zBX

**Answer: A**

**Question No : 4**

The zEnterprise Technical Specialist is talking with the customer support group. The customer technical staff has made several statements regarding their individual understanding of the cabling for zBX racks. Which of the following customer statements is incorrect?

- A. All cables required to connect a zBX to a node are delivered by default.
- B. All cables required to implement and connect a zBX to the customer environment (LAN,SAN) are delivered by default.
- C. All cables required to implement and connect a zBX to the customer environment (LAN, SAN) must be ordered separately
- D. In order to connect a zBX correctly to a customer network detailed planning is necessary the evaluate the requirements (SFPs, cables)

**Answer: C**

**Question No : 5**

A customer is looking for a solution that delivers a workload management across the platforms that run his core application. Additionally he is interested in a continuous availability solution that controls all components of the application independent of the platform that is used for the deployment. Which of the following makes zEnterprise the best match to those requirements?

- A. The new Infiniband coupling link of z196 offer the opportunity to interconnect all platforms. The Unified Resource Manager delivers a central tool to control all events.
- B. z/OS offers with Parallel Sysplex and WLM a best of breed solution. For the distributed part Tivoli System Automation for Multi Platforms (TSAMP) delivers the required functionality.
- C. The combination of Unified Resource Manager, GDPS and TSAMP meets all requirements without changes to the applications.
- D. The customer can consolidate all application parts either on z/OS or on Linux on System z to meet the requirements.

**Answer: C**

**Question No : 6**

What is a differentiator of the System z compared to other hardware platforms?

- A. System z utilizes faster memory to accelerate application execution.
- B. System z utilizes SAP for offloading I/Os from standard processors.
- C. System z platform provides spare processors to improve availability.
- D. System z is the only platform that exploits memory protection technologies.

**Answer: B**

**Question No : 7**

A presales TDA meeting is schedule for a account purchasing a z196 processor to replace distributed systems. Which of the documents are the minimum required for the meeting?

- A. Project schedule
- B. Implementation checklist
- C. Configuration and Checklist
- D. Software Product document

**Answer: C**

**Question No : 8**

A customer recently ordered a z196 with a zBX. Which of the following is the best action a specialist could take to ensure the customer is satisfied with the new zBX?

- A. Review the hardware support process and the HMC documentation for the z196 CPC and the zBX
- B. Conduct and "Fit for Purpose Study"
- C. Conduct a z/VM Implementation Workshop
- D. Mentor the customer on installing PowerVM and VMware

**Answer: A**

**Question No : 9**

A presales TDA meeting is in review process the Technical Specialist finds a problem with the configuration. The incorrect power cord on the z196 was ordered. The machine order was placed and has a Plant Order Number in the system. Which of the following is the correct action to resolve problem?
