IBM

Exam C9510-058

Rational Performance Tester V8

Version: 6.0

[Total Questions: 59]

Question No : 1

Which three steps should you perform to troubleshoot an issue with gathering response time breakdown data from WebSphere Application Server 7.0? (Choose three.)

A. ensure that the WAS server instance is running on the tester server before trying to instrument it
B. check that the account used for performing the instrumentation has administrator or root privileges
C. check if WAS security is active and turn it off
D. check that the application under test is deployed on a stand-alone WAS server
E. check the WAS server that is behind a firewall

Answer: A,B,C

Question No : 2

Why should you clear the cache when you record a test?

A. to force the browser to download all page elements resulting in a more accurate test
B. to force the browser to download all page elements resulting in longer page load times
C. to simulate a new user who has never used the application
D. to simulate actual browser behavior

Answer: A

Question No : 3

Which three factors affect the performance test measurements? (Choose three.)

A. sampling interval
B. network bandwidth
C. think time
D. verification points
E. user load

Answer: B,C,D

Question No : 4

When using custom code, what is a good idea?

A. change the package name and class name
B. comment the Java code well
C. move the package outside of the src directory
D. use a meaningful class name

Answer: A

Question No : 5

How do you set the condition in an if-then statement?

A. use the value of a string or a reference to control executing specified HTTP requests
B. select a reference that has been previously defined in the test
C. enter a string that has been previously defined in the test
D. set a condition that can be evaluated to be true or false

Answer: A

Question No : 6

Your test has three groups: 40% of the users are assigned to User Group 1, 60% of users are assigned to User Group 2, and 1 user is assigned to User Group 3. The user load is set to 51 users How many users are assigned to Group 1?

A. 1
B. 20
C. 40
D. 60

Answer: B

Question No : 7

What should you do first, before you record a performance test?

A. reset the test environment (servers running, data refreshed)
B. start IBM Rational Performance Tester
C. push the red Record button
D. open your browser

Answer: A

Question No : 8

When you first run your test, the results are very spiky. How should you smooth your data?

A. paced loopA.paced loop
B. random selectorB.random selector
C. commentC.comment
D. delayD.delay

Answer: A

Question No : 9

What is the easiest way that a current timestamp in a page request can be generated?

A. by writing a custom code method that invokes java.util.Date
B. by writing a custom code method that invokes java.util.Timer
C. by correlating the timestamp value to a built-in datasource
D. by using the NOW() Excel function in a column of a datapool

Answer: C

Question No : 10

What is the main difference between correlated and pooled data?

A. Correlated data all comes from the same row of the table, while pooled data uses a different line for each request.
