Answer: A

Question No : 4

Which IBM SmartCloud Application Performance Management component is used to create a script for automated Citrix user interface testing?

A. Citrix ICA Reporter
B. Mercury LoadRunner
C. Rational Performance Tester
D. Rational Transaction Script Tester

Answer: A

Question No : 5

How is the Application Management Configuration Editor started?

A. Log in to Tivoli Enterprise Portal and choose Application Management Configuration from the Edit menu.
B. Open Manage Tivoli Enterprise Monitoring Services and choose the Application Management Configuration Editor.
C. Log into Tivoli Enterprise Portal Server and start the command:/opt/iBM/iTM/bin/itmcmd config -A a2.
D. Log in to the IBM SmartCloud Application Performance Management user interface and choose the Application Management Configuration Editor from the AH My Applications widget box.

Answer: A

Question No : 6

What can be performed from the IBM SmartCloud Application Performance Management V7.7 user interface?

A. Restart an APM agent.

B. Modify the configuration of an agent.

C. Modify the threshold value of a metric.

D. Modify the IBM Tivoli Netcool/OMNIbus configuration.

Answer: C

Question No : 7

Which two IBM WebSphere products can be monitored in the IBM SmartCloud Application Performance Management V7.7 user interface?

A. IBM WebSphere IB

B. IBM WebSphere MQ

C. IBM WebSphere WTX

D. IBM WebSphere APM

E. IBM WebSphere DataPower

Answer: B,E

Question No : 8

How can agentless agents collect data on Windows servers?

A. PMI

B. WMI

C. SMTP

D. Syslog

Answer: D

Question No : 9

While customizing the IBM SmartCloud Application Performance Diagnostics user interface, what happens when the size of a widget is changed?

A. The size of its text changes.
