Huawei

Exam HC-611

Huawei Certified Network Associate - Building the Structure of Storage Network (HCNA-BSSN) – ENU

Version: 6.0

[Total Questions: 274]

Question No : 1

S5000T after system startup or insert system disk(or management module)10 minutes to determine the system is fully booted normally, in order to carry out the upgrade.

A. True
B. False

Answer: A

Question No : 2

Argument about disaster recovery and data backup correct yes:

A. Disaster recovery is data backup.
B. Disaster recovery is a method of data backup.
C. Data backup is the foundation of disaster recovery.
D. The above statement is not correct.

Answer: C

Question No : 3

S5500T system is configured with a RAID group,RAID groups may bethe reason for the downgrade:(Choose three)

A. RAID disk group members pulled out
B. RAID disk group members were replaced by other types of hard disk
C. RAID disk bad sectors group members or other failure causes failure to read and write
D. RAID group members is set to hot spare disk

Answer: A,B,C

Question No : 4

Uninstall software underLinuxwhichof the following commands can be used?

A. kill

B. uninstall

C. unload

D. rpm-e

Answer: D

Question No : 5

When you create a LUNcannotmodify the general parameterswhich can only be modified whencreating,created after:(Choose two)

A. Name of the LUN

B. Slitting depth of the LUN

C. LUN ownership Controller

D. Capacity

Answer: B,D

Question No : 6

A full,normal RAID5, including real data and parity data on the disk of its members:

A. True

B. False

Answer: A

Question No : 7

Storage system configuration process to create LUN then create RAID

A. True

B. False

Answer: B

Question No : 8

Huawei SAN storage products have replaceable parts:(Choose three)

A. Hard disk
B. Controller
C. Power supply fan
D. CPU

Answer: A,B,C

Question No : 9

RAID1 data redundancy is achieved through what technology?

A. OX
B. Hamming code check
C. P + Q double check
D. Mirror

Answer: D

Question No : 10

Need at least a few hard drives when you create RAID10

A. 1
B. 2
C. 3
D. 4

Answer: D

Question No : 11

In business given the large number of random data access,data security while demanding scene for what raid level to use?

A. RAID0
B. RAID1
C. RAID3
D. RAID10

Answer: D

Question No : 12

RAID0 often called bands,RAID0 allowed to damage a member of the hard drive data is not lost.

A. True
B. False

Answer: B

Question No : 13

Windows "Disk Management" requires that all dynamic disks and GUID partition table (GPT) are using the NTFS file system on the disk.

A. True
B. False

Answer: A

Question No : 14

S5600T and S6800T when the system power loss by the built- safe dish BBU to power,to ensure that thedata written to the Cache dirty safe dish without losing.

A. True
B. False

Answer: B

Question No : 15

The only two hard disk storage devices,you can choose to create a RAID levels are()(Choose two)

A. RAID3
B. RAID0
C. RAID1
D. RAID6

Answer: B,C

Question No : 16

Huawei package maintenance tool storage products acquisition mode

A. Local Service Manager
B. 400 Response Center
C. Huawei support website.
D. Dealer

Answer: C

Question No : 17

Application for the license file storage system mail must include the following items which(Choose two)

A. Contract Number
B. Control box serial number
C. Customer Name
D. LAC code

Answer: B,D

Question No : 18

Host port type S2600 series storage arrays provide not include()

A. SAS
B. FC
C. iSCSI
D. SATA

Answer: D

Question No : 19

S5000T storage array in the configuration export function to export the system configuration file format()

A. .DAT
B. .EXE
C. .TXT
D. .DOC

Answer: A

Question No : 20

According SHARE 78 international organizations, disaster recovery system is divided into the number of class

A. 5
B. 6
C. 7
D. 8

Answer: C

Question No : 21

Same size,the number of hard drives configured in a RAID group,small random I / O write performance is relatively poor Which RAID?

A. RAID 1
B. RAID 3
C. RAID 0
D. RAID 5

Answer: B

Question No : 22

About BBU battery,the following statement is wrong

A. BBU battery to ensure the external power supply is interrupted cache data will be saved to a specific location
B. BBU will automatically be charged and discharged regularly,if you see a regular alarm information BBU discharge is normal
C. The BBU inside the controller S2600,S5000's BBU external controller
D. S5000T product no BBU Module

Answer: D

Question No : 23

G type fabric switch port is a universal port,depending on the implementation, as F port or E port.

A. True
B. False

Answer: A

Question No : 24

Which of the following are ISCSI protocol advantages in practical applications?(Choose three)

A. Powerful
B. Long distance transmission

C. Safe
D. Low Cost

Answer: A,B,D

Question No : 25

Common storage devices include?(Choose three)

A. Minicomputer
B. Library
C. Virtual Tape Library
D. Disk Arrays

Answer: B,C,D

Question No : 26

SAN storage products for the upgrade,the following statement is wrong

A. Next in the array LUN is formatted,the systemcannotbe upgraded
B. When the system has a hard drive in a dormant state,the systemcannotbe upgraded
C. When using ISM upgrade,it is recommended to maintain the terminal and two controllers can manage network ports are connected
D. When you upgrade the controller software upgrade package file extension.Bin

Answer: D

Question No : 27

RAID technology for efficient data organization and data security is primarily the means through which to achieve?(Choose three)

A. Data striping
B. Sequential read and write data between the members of the panel
C. Verification mechanism
D. Hot standby mechanism

Answer: A,C,D

Question No : 28

When configuring iSCSI attached storage devices on the application server,application server called the target device,a storage device called the Launcher.

A. True
B. False

Answer: B

Question No : 29

SATAargument about the correct yes:

A. ATA to SATA transition from serial to parallel shift.
B. ATA to SATA transition from parallel to serial shift
C. SATA and ATA command set used in a completely different set of instructions.
D. The above statement is not correct.

Answer: B

Question No : 30

WhatNAS to meet the needs of users:(Choose three)

A. Unstructured data growth demands
B. Data sharing needs
C. FC networking support
D. Multi-protocol support requirements

Answer: A,B,D

Question No : 31
