## Exam HP0-D06

### Implementing HP Converged Infrastructure Solutions

Version: 5.0

[ Total Questions: 70 ]

**Question No : 1 DRAG DROP - (Topic 0)**

Drop

Indicate the components with which a logical server can be associated.

Components

virtual machine	place here
application	place here
network component	place here
BladeSystem	place here
ProLiant ML/DL server	place here

Answers

associated
not associated

Done

**Answer:**

Indicate the components with which a logical server can be associated.

Components	
virtual machine	associated
application	not associated
network component	not associated
BladeSystem	associated
ProLiant ML/DL server	not associated

Done

Answers

not associated	

### Question No : 2 - (Topic 0)

A customer has a Central Management Server (CMS) running Insight Manager 7. What must be done to proceed with the installation of HP Insight Dynamics - VSE?

- A. Upgrade to Rapid Deployment Pack 3.7 or later.
- B. Install Virtual Connect Enterprise Manager (VCEM).
- C. Upgrade the server to HP Systems Insight Manager 5.3 or later
- D. Nothing more needs to be done. The installation can proceed without modification.

**Answer: C**

### Question No : 3 - (Topic 0)

What must you do to prepare the ports before stacking Virtual Connect Ethernet Modules?

- A. You must define the root port.
- B. You must designate a port as a stacking port.
- C. You must define upstream and downstream neighbors.
- D. You do not need to do anything because configuration is automatic.

**Answer: D**

**Question No : 4 - (Topic 0)**

Which statement is true about full virtualization?

- A. It can be implemented completely only by using virtualization software.
- B. It can be implemented only by using virtualization software with HP Integrity VT processor assistance.
- C. It can be implemented completely either with virtualization software or with processor virtualization assistance (AMD-V, Intel VT-x).
- D. It is implemented in most operating systems at a basic level and special features require virtualization software assistance.

**Answer: C**

**Question No : 5 - (Topic 0)**

Which key components are used to build a Virtual Connect infrastructure? (Select three.)

- A. Virtual Connect Supervisor
- B. Virtual Connect Ethernet modules
- C. Virtual Connect Pass Thru modules
- D. Virtual Connect Manager
- E. Virtual Connect Switch Manager
- F. Virtual Connect Fibre Channel modules

**Answer: B,D,F**

**Question No : 6 HOTSPOT - (Topic 0)**

### HP HP0-D06 : Practice Test

Click on the location where the Virtual Connect Ethernet Module must be placed in the HP BladeSystem c3000 Enclosure.

#### Answer:

Click on the location where the Virtual Connect Ethernet Module must be placed in the HP BladeSystem c3000 Enclosure.

Question No : 7 - (Topic 0)

What must be done in order to configure Virtual Connect and enclosure bay IP addressing (EBIPA) correctly? (Select two.)

- A. The Onboard Administrator and all Virtual Connect modules must be in the same IP subnet.
- B. The Onboard Administrator must be in an IP subnet different from that where all Virtual Connect modules reside.
- C. Virtual Connect Ethernet modules and Virtual Connect Fibre Channel modules must be in different IP subnets.
- D. The Onboard Administrator IP address must be set properly before changing the IP addresses of the Virtual Connect modules.
- E. The IP addresses of the Virtual Connect modules must be set properly before changing the Onboard Administrator IP address.

**Answer: A,D**

**Question No : 8 - (Topic 0)**

How many c-class enclosures are manageable when running HP Virtual Connect Enterprise Manager 1.30 or later?

- A. 100
- B. 200
- C. 400
- D. 800

**Answer: D**

**Question No : 9 - (Topic 0)**

How many c-class enclosures are manageable by one Virtual Connect domain when running HP Virtual Connect Enterprise Manager 1.30 or later?

- A. 1
- B. 2
- C. 4
- D. 8

**Answer: C**

**Question No : 10 - (Topic 0)**

How many c-class enclosures are manageable by one Virtual Connect domain when running HP Virtual Connect Enterprise Manager 1.30 or later?

- A. HP Server Management GUI
- B. Server Management and Scripting Utility
- C. command line interface for local or serial access
- D. browser-based GUI
- E. command line interface for network access

**Answer: D,E**

**Question No : 11 - (Topic 0)**

You are working in an HP Systems Insight Manager console. First, you click a virtual machine host and then you click the System tab. If the console is using Microsoft Virtual Server or Hyper-V, which button displays?

- A. the Launch VC button
- B. the Launch SC button
- C. the Launch VCVMM button
- D. the Launch SCVMM button

**Answer: D**

**Question No : 12 DRAG DROP - (Topic 0)**
