## Exam HP0-D11

### Designing HP Virtualization Solutions [2010]

Version: 6.0

[ Total Questions: 60 ]

**Question No : 1**

What are indications that a business needs virtualization? (Select two.)

- A. applications and business services not being delivered on time
- B. IT operations that are minimally impacted by business fluctuations
- C. under-utilized IT infrastructure
- D. reductions in maintenance windows

**Answer: A,C**

**Question No : 2**

LACCD is the largest community college district in the United States, educating more than 130,000 students at nine campuses spread throughout 36 cities in the greater Los Angeles area. What are some of the business requirements that led LACCD to migrate from a distributed desktop PC architecture to an HP Client Virtualization Solution? (Select two.)

- A. Educational institutions like LACCD must meet a broad range of requirements defined by users.
- B. LACCD was in the midst of a downsizing and consolidation initiative.
- C. LACCD could dictate technology capabilities from the top down.
- D. School administrators at LACCD use a wide variety of applications where security is essential.

**Answer: A,D**

**Question No : 3 DRAG DROP**

Click the Task button. Product benefits often connect directly to customer business requirements that represent opportunities for virtualization. Some examples of this include such things as accelerating growth, reducing costs, lessening risk, and improving manageability and security. Match each requirement to the way that virtualization helps a business achieve it.

## HP HP0-D11 : Practice Test

Drag and drop the boxes.

Product benefits often connect directly to customer business requirements that represent opportunities for virtualization. ### Virtualization approaches to select:

The ability to quickly analyze resource needs and dynamically allocate resources helps an IT organization enhance availability, continuity, and security, and meet or exceed service level agreements.

Make it possible to deploy, manage, and monitor secure desktop environments that users can access locally or remotely, with or without a network connection, on almost any standard desktop, laptop or tablet PC.

Because servers, storage, networking, and other resources are pooled, resources can be allocated as required.

By making infrastructure more flexible, an IT organization can deliver new applications and business services faster. Adding capacity to meet new or expanding computing requirements can be completed in a matter of minutes or hours.

Done

## Answer:

Drag and drop the boxes.

Product benefits often connect directly to customer business requirements that represent opportunities for virtualization. Some examples of this include such things as accelerating growth, reducing costs, lessening risk, and improving manageability and security. Match each requirement to the way that virtualization helps a business achieve it.

### Business requirement Virtualization approach

Accelerating business growth

By making infrastructure more flexible, an IT organization can deliver new applications and business services faster. Adding capacity to meet new or expanding computing requirements can be completed in a matter of minutes or hours.

Reducing costs

The ability to quickly analyze resource needs and dynamically allocate resources helps an IT organization enhance availability, continuity, and security, and meet or exceed service level agreements.

Mitigating risks

Make it possible to deploy, manage, and monitor secure desktop environments that users can access locally or remotely, with or without a network connection, on almost any standard desktop, laptop or tablet PC.

Improving desktop manageability and security

Because servers, storage, networking, and other resources are pooled, resources can be allocated as required.

### Virtualization approaches to select:

The ability to quickly analyze resource needs and dynamically allocate resources helps an IT organization enhance availability, continuity, and security, and meet or exceed service level agreements.

Make it possible to deploy, manage, and monitor secure desktop environments that users can access locally or remotely, with or without a network connection, on almost any standard desktop, laptop or tablet PC.

Because servers, storage, networking, and other resources are pooled, resources can be allocated as required.

By making infrastructure more flexible, an IT organization can deliver new applications and business services faster. Adding capacity to meet new or expanding computing requirements can be completed in a matter of minutes or hours.

## HP HP0-D11 : Practice Test

---

An EVA solution, currently managed by an Array-Based Management (ABM), will be expanded to a Continuous Access solution. Which prerequisite must be met in order to implement the solution?

- A. register SVSP Continuous Access licenses in CommandView EVA
- B. install HP Insight Remote Support Standard on physical server
- C. register Business Copy licenses in CommandView EVA
- D. switch CommandView EVA to Server-Based Management (SBM)

**Answer: D**

### Question No : 5

Which HP StorageWorks products or solutions provide virtualized scale-up storage? (Select two.)

- A. X9000 Network Storage Systems
- B. HP StorageWorks 4400 Scalable NAS File Services
- C. X5000 Storage Systems
- D. P4000 SAN Solutions
- E. Enterprise Virtual Array (EVA)

**Answer: B,E**

### Question No : 6

Which IEEE proposal has HP co-authored as part of their HP FlexFabric solution?

- A. Converged Enhanced Ethernet (CEE)
- B. Fibre Channel over Ethernet (FCoE)
- C. Virtual Ethernet Port Aggregator (VEPA)
- D. Virtual Connect Flex-10 Ethernet

**Answer: C**

### Question No : 7 DRAG DROP

## HP HP0-D11 : Practice Test

Click the Task button. Match each HP Converged Infrastructure Consulting Service with its description.

Drag and drop the boxes.

Match each HP Converged Infrastructure Consulting Service with its description.

**Descriptions**

<div style="background-color: yellow; border: 1px solid black; padding: 5px;">[place here]</div>	<div style="border: 1px solid gray; padding: 5px;">roadmap to achieve the envisioned state, with defined phases</div>
<div style="background-color: yellow; border: 1px solid black; padding: 5px;">[place here]</div>	<div style="border: 1px solid gray; padding: 5px;">awareness of the concept of shared services and converged infrastructure</div>
<div style="background-color: yellow; border: 1px solid black; padding: 5px;">[place here]</div>	<div style="border: 1px solid gray; padding: 5px;">testing most common scenarios and demonstrating capabilities</div>
