

HP

Exam HP2-K16

Selling HP StorageWorks XP Disk Arrays

Version: 6.0

[Total Questions: 64]

Question No : 1

Which HP Adaptive Infrastructure enabler aggregates physical resources, and presents those resources as capabilities that can be used by applications, desktop clients, or other types of storage clients?

- A. automation
- B. virtualization
- C. management
- D. IT systems and services

Answer: B

Question No : 2

Which Adaptive Infrastructure key enabler allows customers to shift the focus of their human resources from maintenance-related tasks to more strategic or innovative requirements?

- A. security
- B. automation
- C. virtualization
- D. power and cooling

Answer: B

Question No : 3

Which term describes how business technology results are measured?

- A. reduced costs
- B. strategic growth
- C. business enablers
- D. business outcomes

Answer: D

Question No : 4

HP HP2-K16 : Practice Test

A customer wants to discuss the industry trend toward organizations developing a 24 x 7 lights-out data center. Which HP business technology strategy addresses this trend?

- A. Grid Computing
- B. Adaptive Infrastructure
- C. Business Information Optimization
- D. Business Technology Optimization

Answer: B

Question No : 5

Which HP StorageWorks Disk Array software shifts most of the replication workload to the remote site, reducing resource consumption on the primary storage system and improving production application performance?

- A. XP External Storage
- B. XP Replication Monitor
- C. XP Continuous Access Journal
- D. XP Continuous Access Asynchronous

Answer: C

Question No : 6

How do HP StorageWorks XP24000 and XP20000 Disk Arrays make regular and comprehensive disaster recovery testing more feasible and affordable?

- A. They enable application-based cache partitioning.
- B. XP Thin Provisioning Software is included for virtual test pool creation.
- C. They provide a cost-effective SAS technology for tier-two environments.
- D. They support a single replication technology across heterogeneous platforms.

Answer: D

Question No : 7

Which replication option, employed between the primary data center and a nearby hot site, provides a data copy that is fully current at all times over a limited distance?

- A. journal
- B. synchronous
- C. deduplication
- D. asynchronous

Answer: B

Question No : 8

What is an HP Continentalclusters solution differentiator when compared with HP Metrocluster solutions?

- A. supports XP Disk Arrays
- B. supports bi-directional failover
- C. uses multiple clusters to provide application recovery
- D. uses XP Continuous Access Software for array replication

Answer: C

Question No : 9

A customer has an environment with a diverse collection of disk arrays and wants to simplify management and migrate data between disk arrays. Which HP StorageWorks Software should you propose?

- A. XP Array Manager
- B. XP External Storage
- C. XP Thin Provisioning
- D. XP Tiered Storage Manager

Answer: B

Question No : 10

From an application perspective, which activities require transaction-oriented performance from the HP StorageWorks XP Disk Array? (Select two.)

- A. email
- B. initial array loading

- C. backup and restore
- D. data warehouse creation
- E. Enterprise Resource Planning (ERP)

Answer: A,E

Question No : 11

What are Online Transaction Processing (OLTP) applications measured in?

- A. I/O per second
- B. MB per second
- C. GB per second
- D. transactions per second

Answer: A

Question No : 12

Which RAID configuration is capable of providing usable storage capacity up to 87.5%?

- A. RAID 1
- B. RAID 5
- C. RAID 6
- D. RAID 0 + 1

Answer: B

Question No : 13

Which RAID level uses block level striping and distributed parity?

- A. ADG
- B. RAID 0
- C. RAID 5
- D. RAID 0 + 1

Answer: C
