## Exam LOT-408

### IBM Notes and Domino 9.0 Social Edition Application Development Update

Version: 6.0

[ Total Questions: 106 ]

**Question No : 1 - (Topic 0)**

Henry is creating a custom control. When this control is added to the XPage, Henry wants the developer to be able to create and enter a regular expression that will be used inside the custom control to validate data input. How can Henry make it easy for the developer to create and define this regular expression value that will be used in the custom property of the custom control?

- A. Use the Regular Expression editor in Eclipse and then copy the code to the XPage.
- B. Point the developer who will be using the custom control to a website that has a regular expression tester.
- C. Create a Custom Control Property Definition and specify for the editor to use the Regular Expression Picker.
- D. The developer can type in the regular expression into the custom property that Henry defined as part of the custom control after it has been placed on the XPage.

**Answer: C**

**Topic 2, Volume B****Question No : 2 - (Topic 2)**
