IBM

Exam LOT-442

IBM Notes and Domino Fundamentals

Version: 6.1

[Total Questions: 195]

Topic break down

Topic	No. of Questions
Topic 1: Volume A	100
Topic 2: Volume B	95

Topic 1, Volume A

Question No : 1 - (Topic 1)

Earl would like to access his mail file locally versus on his mail server. He is considering creating a local replica or managed mail replica for his mail file. Which benefit does Earl gain if he uses managed mail replica instead of local replica?

A. The managed replica routes mail directly to the server's mail.box.
B. If the managed replica becomes corrupt, it will be deleted and recreated automatically.
C. The managed replica will use the server replica's full-text index instead of having one locally created.
D. A managed replica will notify Earl when new mail arrives, but he'll have to replicate manually or on schedule.

Answer: B

Question No : 2 - (Topic 1)

Of the following condition types when defining a mail rule, which will take the longest to process?

A. body
B. sender
C. subject
D. importance

Answer: A

Question No : 3 - (Topic 1)

In order for AdminP to work properly, what must every IBM Domino database have?

A. an AdminP certifier
B. an AdminP xACL entry
C. an AdminP retry interval
D. an Administration server

Answer: D

Question No : 4 - (Topic 1)

Eileen and Teresa need to schedule a meeting every week for the next seven weeks to discuss a new project. Using the IBM Notes client calendar functionality, how would Eileen most easily determine when Teresa is available for these meetings?

A. Give Teresa access to Eileen's calendar and let her pick the times she wants.
B. Click 'Find available times' on the calendar invitation for a list of open times for both of them.
C. Open Teresa's calendar on the server and write down dates when Teresa is free, then send an invitation.
D. Open the free time database on the server and write down dates when Teresa is free, then send an invitation.

Answer: B

Question No : 5 - (Topic 1)

Mail recall has been enabled on all IBM Domino 8.5 servers in Marilyn's company. What are two reasons why mail recall could fail? (Choose two.)

A. The time period to recall has expired.
B. The message was routed over SMTP.
C. The message was sent to another Domino domain.
D. The Domino mail server has implemented mail journaling.
E. The Domino server has a maximum message threshold per day for mail recall.

Answer: A,B

Question No : 6 - (Topic 1)
