Exam M2170-741

IBM i2 Intelligence Sales Mastery Test v2

Version: 6.0

[Total Questions: 40]

Question No : 1

What challenges do organizations face when developing a cyber strategy?

- A. Lots of streaming disparate data, that is fragmented across stakeholders, systems and regions
- B. The malware footprint doesn't change
- C. Only A
- D. A and B

Answer: C

Question No : 2

Which of the following are two (2) Cyber intelligence sweet spots?

- A. Impact analysis; Detection
- B. Attack tree development; Prevention
- C. Impact: Actor/team analysis
- D. Detection: Attack tree development

Answer: B

Explanation: *Organizations must evolve, replacing traditional defensive security strategies with a proactive, intelligence-driven offense to prevent and disrupt these threats.

* Documenting attacks in a form of attack trees. One of the most important problems in security analysis is the malefactors' classification and model construction.

Note: With the IBM i2 Enterprise Insight Analysis solution, organizations can proactively develop a comprehensive understanding of their attack surfaces and vulnerabilities and develop referenceable attack scenarios to help speed investigations and remediation. To prevent future attacks, organizations can identify and investigate attackers after an incident. All insights become part of the organization's cyber security strategy and tactics, resulting in stronger and smarter cyber security.

Question No : 3

i2 solutions support the fraud detection and investigation lifecycle at which points in particular?

- A. Data and Discovery
- B. Discovery and Manage
- C. Investigate and Report
- D. All of the above

Answer: D

Explanation: BM i2 Fraud Intelligence Analysis can be used as a stand-alone fraud identification and analysis solution where currently there is either no, or only a manual, capability currently. It can also be deployed in conjunction with other IBM products to deliver against the entire fraud lifecycle, such as predictive analytics for fraud detection, business process rules, and case management, to support the management of fraud investigations.

Question No : 4

ILE Standard is aimed at:

- A. Detectives. Command Staff. Patrol Officers
- B. Parole Officers
- C. Analysts and investigators
- D. Command staff only

Answer: A

Question No : 5

Which are benefits of the i2 Enterprise Intelligence Analysis solution?

- A. Easy presentation of statistical representation of data
- B. Increase efficiency across all areas of the intelligence lifecycle
- C. Leverage the value of existing i2 investment and lower the total cost of ownership
- D. B & C above

Answer: D

Explanation: B:Increase Efficiency

- Consolidate massive data sets with a 24x7 automated identity resolution engine.
- Search and automatically process and analyze unstructured data.
- Perform link, temporal and geospatial queries and run network analytics across hundreds of terabytes of data in seconds.

C:A cost-effective solution that supports operationalefficiency

- Integrate with and use current infrastructures, systems and data.
- Commercial, 'off-the-shelf' design minimizes need for developer support.
- Improve operational and situational awareness with dashboard and Key Performance Indicators.
- Uncover non-obvious relationships by applying multi-dimensional visual analytics.
- Flexible and agile design can be easily extended with third-party and IBM applications to meet changing needs.

Question No : 6

What are the core capabilities of NDI?

- A. Intelligence repository
- B. GIS interface
- C. Visual analysis
- D. All of the above

Answer: D

Explanation: A:Exploit multiple repositories either: within IAP or the main repository or "in place" where they live outside IAP – For example, existing iBase
